

Instructions for use:

To expand Viagrow coco coir block: take coir out of plastic package, soak in about 1 gallon of water.

The block fluffs into approximately 2 gallons/7.5 Liters ready to use premium coir.

Use as a soil amendment or mix with grow rocks, perlite, vermiculite or your favourite soil or soilless media.

www.viagrow.biz

Coir uses include:

- Outdoor gardening and landscaping
- Hydroponic vegetable/flower production
- Potted plant production
- Soil amendment
- Garden soil
- Worm casting
- Roof top gardening
- Green house propagation & growing
- Mushroom production
- Co-substrate for compost
- Reptile bedding (terrarium substrate)

Coir benefits:

- 100% all natural, renewable media
- Ideal pH for plant growth
- Promotes strong root growth and plant vigor
- No wetting agents required
- Reduces water frequency without plant stress
- Able to hold high amounts of water, while maintaining excellent aeration
- Compressed for easy storage and transportation
