

Coppertop® Sweet Viburnum

Viburnum odoratissimum 'BRANT01' PP30449

The Coppertop Sweet Viburnum is a brilliant, bold, and beautiful new ornamental shrub from the Southern Living Plant Collection! It features glossy dark maroon-red new growth that fades to copper and then olive green over the season. Therefore, it sports a multi-toned appearance throughout much of the season. Furthermore, it also produces **small white flower clusters** with a **light fragrance** in spring.

It grows naturally upright with a bushy form and reaches 8-10 feet H x 5-6 feet W at maturity. Its foliage is surprisingly **compact and dense**, without any pruning. Therefore, this is a notably **low-maintenance** addition to your landscape.

It's perfect for a trimmed hedge, privacy screen, mass planting, or even as a specimen.

Bloom/Feature- Bronze copper pink to dark green foliage

Evergreen or Deciduous- Evergreen

Plant Hardiness Hardy to 5°F to 10°F

Key Features- Aromatic, Attracts Birds / Butterflies, Compact Habit, Cut Flowers, Deer Resistant, Disease / Pest Resistance, Drought Tolerance, Easy Care, Heat Tolerance, Upright Habit, Year-Round Interest

Flowering Season- Summer to Fall

Uses- Accent, Container, Hedge, Mass Planting, Privacy Planting, Woodland Garden

Water Needs- Medium

Fertilize Yearly in early spring

Pruning- Shape as needed

Planting Instructions

- Water before planting
- Plant in full sun
- Dig hole 2X the width of pot
- Plant 1-2" above ground soil level, backfill hole with soil
- Water deeply to settle, then add more soil if needed
- Mulch 1-2" deep around plant, avoiding area closest to stem
