

ATV/UTV EQUIPMENT

FLIP DISC

One of the top pull-type implements for garden tractors and ATV's on the market. It flips over with ease so you can move from area to area to smooth clods of soil after plowing, or prep the surface for planting game food plots, cover crops, or large vegetable gardens. It also uproots and destroys weeds in sandy soils.

At 231 lbs, it features a boxed steel frame that can be weighted for aggressive cutting, a pull-pin hitch, eight notched 16" cutting blades and a full 4' cutting width with a 20" cutting angle, and finished with a durable corrosion-resistant powder-coat.
