Focused on industry solutions. Norwesco has applied its engineering innovation and flawless manufacturing execution to products that serve a wide variety of industries, sectors and jobs. These icons will help guide you to the right products for the right job.

## NORWESCO

PRODUCTS.
DESIGNED WITH YOUR BUSINESS
IN MIND.

At Norwesco, all of our tanks are designed with our customers in mind Made of proprietary resin, using superior molds, all our tanks are rugged, impact and corrosion resistant with no seams or welds. They are available in a variety of specific gravity ratings to meet specific usage in any industry.

The industry symbols shown here appear on each product page throughout the brochure to note the industries where that product is most likely to be used.

NORWESCO LIQUID STORAGE TANKS. ALL CONTAIN A RICH HISTORY OF EXCELLENCE.

In 1939, Norwesco Plastics was born. When the popularity of rotomolded tanks took off in the 1970s, Norwesco was an early adopter and leader of the rotational molding process.

Since then, we have continued providing customer-focused designs with a true commitment to high quality rotomolded tanks. As a result of our deep expertise and longevity in the business, we have become the leaders in resin developments and efficient molding.

There is no "roto-molding course" you can take. It's learned on the job and passed on from one person to another. We have many people who have been with us 20,30,40 years. At all levels of the company we have people who are 2nd and 3rd generations of a family to work for Norwesco.

That is key to our understanding of the rotomolding process and producing quality products each and every day.

A photo from the 80 s of Jim Nordgaard standing proudly among tanks made in Sheldon, lowa. 40 years later, Jim's son, Lee manages our Sheldon plant and sits in the same office his dad once used.

## NORWESCO PRODUCTS.

ALL SHARE THE SAME

## EXCEPTIONAL DNA.

Regardless of size or application, all of our tanks share key features that set Norwesco tanks above all others.

## Product features include:

- One-piece construction with no seams or welds
- Available in a variety of specific gravity ratings to meet any application
- Full replacement warranty
- The highest strength to weight ratio in the industry
- Superior mold design that yields the required tank strength without using unnecessary resin
- Proprietary resins that produce rugged, impact resistant, corrosion resistant products
- Resins approved by the FDA for use with food grade items and potable water

## What do our specific gravity ratings mean?

Specific gravity (SG) is the relative weight of a liquid compared to the weight of the same volume of water. Water will always have a specific gravity of 1.0 while liquids heavier than water will have a specific gravity greater than 1.0 .

Specific gravity of a liquid will always be the same regardless of the unit of measures used to describe how "heavy" a liquid is. So while liquid nitrogen fertilizer (UAN 28-0-0) weighs $10.65 \mathrm{lb} / \mathrm{US}$ gallon, $12.78 \mathrm{lb} / \mathrm{Imperial}$ gallon, and $1.28 \mathrm{~kg} / \mathrm{litre}$ - all of those work out to a specific gravity of 1.28 . That is why we use specific gravity to rate what weight of liquids our tanks are designed to work with. All of our tanks have one of the following specific gravity ratings when used in their designed application:

## WATER ONLY - 1.1 SG

These tanks will be marked
"water only" - 3 year full replacement warranty

## PREMIUM WEIGHT - 1.5 SG

These tanks are white in color -
3 year full replacement warranty

## HEAVY DUTY - 1.9 SG

These tanks are blue in color
5 year full replacement warranty

M．IORUESCD

## NORWESCO VERTICAL STORAGE TANKS．

THE INDUSTRY GOLD STANDARD．

Vertical Tanks are designed for stationary storage in the industry＇s widest variety of capacities，sizes，and specific gravity ratings．
－ 10 to 20，000 gallons
－Premium Weight tanks are white and made to a specific gravity rating of 1.5
－Heavy Duty tanks are blue and made to a specifc gravity rating of 1.9
－Vertical Tanks come standard with an outlet fitting and a vented lid
－UV－15 stabilized resin provides best－in－class resistance to ultraviolet light degradation
－Optimum balance of low temperature toughness，creep resistance，stiffness， and resistance to environmental stress cracking

## NORWESCO VERTICAL STORAGE TANKS.

THE STRONG, SILENT TYPE.

HR
© HORWESCD
water
HYDROPONICS

NORWESCO ABOVE Norwesco Water Tanks are manufactured using resins that have FDA approval GROUND WATER for the safe storage of potable water. The black or green color limits light STORAGE TANKS penetration, which reduces the growh of water-borne algae. These tanks are ONLY! They should not be used for chemicals, fertilizers or any other product. Where applicable, the tanks will have NSF61 approval.

- Available in sizes from 40 to 15,500 gallons
- Available in black and three variations of green
- In addition to outlet fittings, each water storage tank
comes with an overflow fitting installed near the top of the tank
- Ideal for rain collection, drinking water storage, hydroponic growing operations, and fire supression water storage

## CONE BOTTOM

 TANKS. FAST AND COMPLETE DRAINING.Cone Bottom Tanks come in a variety of slopes. Sizes of 55 to 10,000 gallons have steel stand options sold separately. Sizes of 125 to 3000 gallons are available in a complete tank and polyethylene stand configuration

## STEEL STANDS

- Structural steel construction with powder coated black finish
- Engineered to provide proper support for the conical bottom - Sold separately

## POLY STANDS

- Rugged polyethylene construction
- Ideal for highly corrosive
environments
Molded to fit securely to the tank
- Cone Bottoms in polyethylene stands are sold as a complete unit

NORWESCO ELLIPTICAL LEG TANKS.
BEHIND THE SCENES PERFORMANCE.

## 

TRANSPORT LEG TANKS．REDUCE SLOSHING WHEN ON THE MOVE．

Norwesco＇s Horizontal and Elliptical Transport Leg Tanks combine to make the broadest range of sizes in the industry－from 35 to 6025 gallons． Designed specifically for heawy duty transport applications，these tanks secured with our proven band system provide the safest，most secure， longest lifespan tanks available．
－Available in 2 styles：Horizontal（equal width and height）and Elliptical （lower centre of gravity to capacity ratio）
－Norwesco pioneered what remains the industry＇s most secure method of securing transport tanks to decks．More importantly，bands control the inherent flex of polyethylene and maintain the tank＇s shape．．．．meaning a longer in－service lifespan．
－Molded－in baffles reduce liquid surge in moving loads．Lids are not located at the ends of the tank where they are prone to being blown out．

## TOTAL DRAIN LEG TANKS.

 ENGINEERED FOR SAFE USAGE.Norwesco's Total Drain Leg Tanks are the industry's best way to achieve total drainage in a transport tank. These tanks are built with a bottom that is sloped both from end to end, and side to side. This creates total drainage that is much faster and less prone to vortexing, than tanks with sump options or tanks that are sloped in only one direction. Whether avoiding cross-contamination between liquids or assuring total transfer of a load, Total Drain Tanks give complete confidence that the tank will be $100 \%$ empty.

PICK-UP TRUCK TANKS. EASY TO MOVE AND FITS ANYWHERE.

Designed to fit full-size pickups, the 325 and 425 sizes have low profiles for better rear vision. The 210 fits both full-size and small pickup trucks. All of them feature fill openings offset to the side of the tank for safe and easy access. The 200 and 300 Space Saver Tanks have flat surfaces on top suitable for mounting pumps or hose reels.

300 SPACE SAVER

SPECIALTY SPHERE TANKS. FOR USE ON TRAILERS.

The Sphere Tanks are most often used on trailers that are specifically designed with the tank to allow for complete drainage and a tight turning radius.

## FLAT BOTTOM

 HAULING TANKS. NO JOB TOO BIG.

The Flat Bottom Hauling Tank is ideal for use on flatbed or drop deck trailers. Large ribs eliminate the need for steel support bands and assist with reducing the sloshing of fluid.

## APPLICATOR TANKS. PROVEN QUALITY.

 huge selection.Norwesco Applicator Tanks are designed specifically for sprayers and other mobile application equipment. To make them easier to clean and drain better, these tanks do not have molded in legs. Every size has a sump that includes either one or two fittings depending on the size of the tank. Most models have a matching saddle option for mounting the tank.

Inductor Tanks are ideal for mixing and dispensing applications. The conica bottom ensures complete drainage. Steel support stands (sold separately) are available for round inductor tanks. The smaller rectangular tanks have threaded inserts for mounting.

The Handler is proudly owned

25

## RECTANGULAR

 UTILITY TANKS. 4 VERSATILE AND COMPACT STYLESDesigned specifically to maximize liquid storage in tight spaces, these rectangular tanks are suitable for both stationary and mobile applications. They are commonly installed in truck or trailers for uses like lawn care, construction, trades, mobile washing, safety water, motorsports, and outdoor recreation.

## Rectangular Utility Tanks come

 in 4 different styles to fit any application:PCO - Molded-in legs, a curved bottom for drainage. Smooth or ribbed.

- Flat Bottom - Full rectanglular, flat bottom, several fitting locations.
- Loaf - More pronounced structural wall ribbing.
- Low Profile - Lower versions of the Loaf style tanks.

FLAT BOTTOM
.

## CONTAINMENT

BASINS. ONE PIECE
SEAMLESS UNIT.

Our impact and corrosion resistant Containment please note: Basins are molded as a one-piece, seamless unit. Required containment volume may vary by application and jurisdiction. Check with your local authorities for details.

## HINGED LIDS

LID ACCESSORIES AND REPAIR KIT

This lid is manufactured from a co-polymer material for strength, durability and excellent chemical resistance. Our unique locking tab allows you to easily slip a padlock through it and secure your lid from theft or spills. Retrofittable in any standard $16^{\prime \prime}$ tank opening.

- Easy open/close - opens a full 180 degrees.

POLYPROPYLENE BULKHEAD FITTINGS

Norwesco's polypropylene fittings come standard with an EPDM gasket. Viton gaskets are available as an option when EPDM may not be suitable for your application. The 2" stainless steel bulkhead fitting comes standard without a gasket. All of our bulkhead fittings are double threaded so you can make connections both inside and outside of the tank.

Faster and more efficient delivery - Norwesco's unique decentralized manufacturing structure means customers are never too far from one of our plants. This close proximity translates directly to lower overall delivered price.

MAE USA

Can I purchase tanks directly from Norwesco?
With manufacturing plants spread throughout the USA and Canada, we have established an extensive distributor network that we support. Our tanks are sold exclusively through these partner distributors. Use the QR code or the "Find a Distributor" button on our website to find a distributor near you.

Are your tanks FDA approved and safe to use with potable water?

Find Distributer

FAQS

Yes! It is safe to store potable water in the Norwesco LST line of tanks. The resin used to manufacture these tanks meets FDA specifications for safe storage of potable water. More information on the FDA regulation our resins meet can be found on our FAQS webpage.

What is the maximum temperature that your tanks will withstand?
The temperature that polyethylene begins to soften at is a physical property that cannot be changed. Our polyethylene tanks have a maximum storage temperature of $120^{\circ} \mathrm{F} / 50^{\circ} \boxtimes \mathrm{C}$. Tank contents with a temperature in excess of $120^{\circ} \mathrm{QF}$ (even for a short period of time) can weaken the tank's structural integrity and make it susceptible to deformation and possibly failure.

What will happen to my tank if I leave it outside in freezing temperatures?
The tank itself does not have a minimum temperature rating. The cold temperature "brittle point" of polyethylene is well below even the coldest recorded winter lows. If you plan to keep the liquid in the tank and you know that it will freeze, make sure that you leave room for expansion. Careful consideration should be given to any plumbing connected to the tank in case it freezes and causes damage to the tank's fitting.

What chemicals can I store in your tanks?
Most fertilizers and chemicals can be used in our above ground tanks.
Your chemical supplier can normally provide you with an MSDS (Material Safety Data Sheet) for their product which can help determine chemical compatibility with our tanks. If you need further assistance, please call our Customer Service department and they will be happy to research it for you. In addition to an MSDS, please be able to provide them with the temperature of the product and the product concentration.

What material are your tank fittings made of?
Our standard bulkhead tank fittings are made of glass-filled polypropylene and our standard gaskets are made of EPDM. When checking the compatibility of your chemical and our tanks, don't forget to check the fitting materials as well. In addition to polypropylene, we can also provide tank fittings made of stainless steel and there are several options for gasket material.

## How should I plumb my tank?

Rigid piping must not be connected directly to a tank - a flexible connection of some sort is required. Good quality hose is the most common way to do this. A flexible connection allows the tank to expand and contract under normal fill and empty cycles, without causing undue stress on the tank. This will extend

## NORWESCO'S FULL <br> REPLACEMENT WARRANTY. THE BEST IN THE BUSINESS.

Norwesco is proud to offer a full replacement warranty for the entire warranty coverage period. That means you get full coverage during the first critical years of owning your tank without the reduced coverage offered in longer but pro-rated warranties.

## What do we offer?

Premium Weight (1.5 SG) and Water Only (1.1 SG) tanks come with a three (3) year warranty period. Heavy Duty (1.9 SG) tanks come with a five (5) year warranty period.

Norwesco warranty covers any defects in material and workmanship discovered in tanks used in their intended way and under normal conditions. Should a defect be found within the warranty coverage period, Norwesco will replace the tank. Warranty coverage is limited to the tank itself and does not include additional costs such as lost product or removal and reinstallation of a tank.

## Find out more.

For full warranty information go to www.norwesco.com/aboutus or contact our Customer Service Department at 800-328-3420 or by email at customerservice@norwesco.com.
