NUTRI-DRENCH

Superior, nutrient rich, high energy support
*No Digestion Required – Immediate Nutrient Balance
Delivers all vital nutrients to restore the immune system
in minutes!*

Martha Phillips, Bloomfield, IN

"I bottle feed all newborns. Sometimes one will lay down. I give it 1 or 2 pumps of Goat Nutri-Drench and within 30 minutes, it's up and looking for a bottle. I give Nutri-Drench to all newborns as soon as I dry them off. I'm sold on it and won't start a kidding season without it. I also credit Nutri-Drench for keeping a doe with severe coccidiosis living long enough to get to the vet."

Joan Coker, Scottsbluff, NE

"If I see scours, I give Goat Nutri-Drench to stop it right away. If a doe goes off feed, I use Nutri-Drench and by next feeding, they start to nibble or are completely back on feed. I never have to use it more than twice. I also use it at shows for a winning edge. I give it on arrival and before entering the ring. I never have a goat go off feed or scour and they have a perky attitude."

Patricia Dickey, Genoa, IL

Northern Illinois Dairy Goat Assn.

"I had a doe deliver 3 kids. The last one was so weak, he couldn't hold his head up and wouldn't even try to suck. I tried Goat Nutri-Drench and in 5 minutes, his head was up and in 10 minutes he was drinking and was as lively as his sisters. I wouldn't have believed it if I hadn't seen it myself."

Stress Dose: Give orally

Newborns: 4 cc at birth

Adults: 1 fl. oz. (30 cc) per 100 lbs. body weight
