

nfz™ puffer

0.2% Nitrofurazone Antibacterial Powder

Indications

NFZ™ Puffer is an FDA-approved antibacterial powder administered topically for the treatment of ear and eye infections, surface wounds, cuts, and abrasions in dogs and cats.

0.2% Nitrofurazone in a water-soluble base.

NADA 11-154, Approved by FDA

Item No.	Description
142674	nfz™ puffer 1.59 oz, 12/case

Dosage and Administration

Shake or rotate to loosen powder.

Eye Infections

Squeeze container to force a stream of powder directly into the eye. Repeat treatment daily. If no improvement after four days a new diagnosis should be made or a veterinarian consulted.

Ear Infections

Clean inside of ear and ear canal with cotton. Insert nozzle of container into ear canal and squeeze twice. Repeat daily until improvement is noted.

Surface Wounds, Cuts and Abrasions

Apply daily until danger from infection is eliminated or until healing takes place.

Human Warnings

Carcinogenic: Nitrofurazone has been shown to produce mammary tumors in rats and ovarian tumors in mice. Some people may be hypersensitive to this product.

Wear gloves when applying and wash hands afterward.

Warnings

For animal use only.

Not for human use.

Keep out of reach of children.

Caution

Federal law prohibits the use of this product in food producing animals.

Storage

Store at a temperature between 20°C-25°C (68°F-77°F).

Avoid excessive heat (104°F) and exposure to alkaline materials.
