

Prozap® Screw Worm and Ear Tick Aerosol with Violet Marking Dye

Product Number: 1002520

Purpose

Prozap Screw Worm and Ear Tick Aerosol is a multi-purpose permethrin spray used to control insects on beef and dairy cattle, sheep, goats, hogs, and horses. Contains a violet marking dye for use on wounds to identify treated areas and uniform coverage. Designed to kill and repel flies, fly maggots, and ticks (including ear ticks) on livestock.

Description

Prozap Screw Worm Aerosol is a permethrin-based aerosol registered for use on beef cattle, horses, and sheep to kill screwworms, flies, and maggots infesting wounds. When treating an open wound, hold the can 4 to 8 inches from the affected area and spray until completely wet—typically 3 to 10 seconds—making sure to cover both the wound and surrounding tissue. Always read and follow label directions before use. This product is not recommended for use in deep wounds.

Beyond wound treatment, Prozap Screw Worm Aerosol is labeled for direct application into the ear canal for ear tick control and for use against stable flies, horse flies, deer flies, face flies, horn flies, mosquitoes, ticks, and gnats on beef and dairy cattle, goats, sheep, hogs, and horses. Important: Do not ship swine for slaughter within 5 days of last treatment. Always use in accordance with label directions. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read entire label Precautions, Use Restrictions, and Directions for Use and SDS before using.

Active Ingredients

Permethrin*	0.5%
Other Ingredients**	99.5%
Total	100.0%

* (3-phenoxyphenyl) methyl (+/-) cis/trans 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylate (Cis/Trans ratio: Min. 35% (+/-) cis and max 65% (+/-) trans.)

General Uses	Insects Controlled	Premise Uses	Animal Uses
On animal, wound treatment	Maggots, flies, mosquitoes, gnats, wasps, screw worms, ticks, lice, and other insects	N/A	Beef and dairy cattle, swine, goats, horses, and sheep

Prozap Screw Worm Ear Tick Aerosol (EPA Reg. No. 47000-100; TDA Account No. 0722104) is recommended for use on beef cattle, dairy cattle, horses, sheep, goats, and swine to aid in the prevention and treatment of infestation by New World Screwworm (*Cochliomyia hominivorax*) in Texas and Florida.

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This 2(ee) recommendation contains directions for use which do not appear on the package label and must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on the EPA registered label when using Prozap Screw Worm Ear Tick Aerosol.
