ASSEMBLY

Review all steps and understand assembly before beginning.

Do not fully tighten hardware until all components have been loosely assembled.

If bolts are tightened too soon, mounting holes may not align, and parts may not easily fit together.

TIP: Always fully insert the hex key inside the designated notch of the bolt.

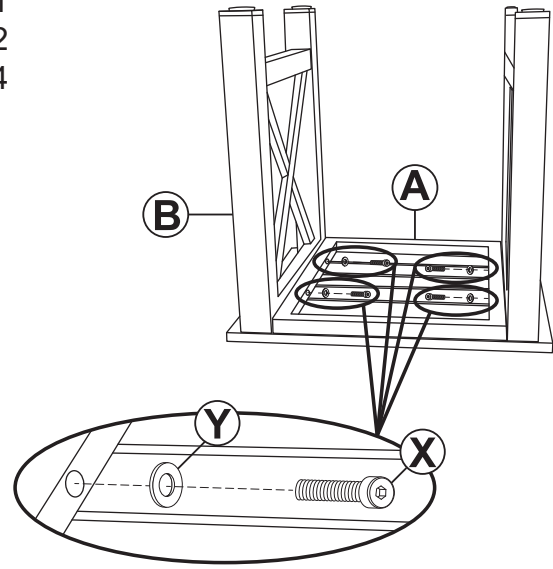

If the hex key is not fully inside the notch, the hex key could slip out, causing damage to the bolt head. Repeated hex key slipping will cause the notch to become rounded, making it difficult or impossible to tighten the bolt with the hex key.

STEP 1

TIP: Assemble components on a clean, soft surface to avoid damaging surfaces.

A: 1
B: 2
X: 4

- Lay Top Shelf (A) upside down on a soft, clean surface.
- Align the mounting holes on the top of one Leg (B) with Top Shelf (A) and loosely fasten using two M6x35mm Bolts (X).
- Repeat to loosely fasten the remaining leg.

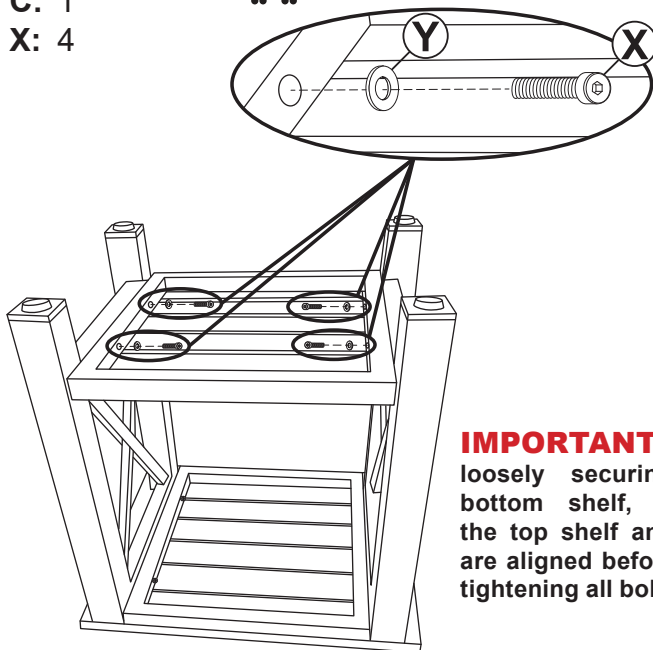

Do not fully tighten the bolts.

STEP 2

Assistance is recommended for this step.

C: 1
X: 4

IMPORTANT: After loosely securing the bottom shelf, ensure the top shelf and legs are aligned before fully tightening all bolts.

- Align Bottom Shelf (C) with the mounting holes on the bottom of the legs and loosely secure using four M6x35mm Bolts (X).

Fully tighten all hardware after this step is complete.

STEP 3

- Before use, ensure the bench is level with the floor. Turn the threaded feet until balance is achieved.

NOTE: The threaded feet are only effective on slightly uneven surfaces.
