

SCENT THIEF™

2023 PRODUCT CATALOG

MAKE THE WIND YOUR COVER

Scent Thief's revolutionary formula is the first and only product to completely remove an animal's sense of threatening odors without using enzymes, cover scents or chemicals. Our patented formula relaxes the area of the nose responsible for detecting odors, temporarily shutting down an animal's sense of smell. When an animal gets Scent Thief in their nose, they won't be able to smell anything else. Guaranteed. Give yourself an advantage and let the wind act in your favor.

SCENT THIEF™

Scent Thief is unlike any other product on the market today. Its innovative formula **TOTALLY** eliminates an animal's ability to smell.

Every other product on the market uses enzymes, silver, ozone or other additives to try and eat bacteria; or, they try to overpower an animal's nose with a really strong scent. At Scent Thief, we believe it's unrealistic to do either. Our research has shown that it's **nearly impossible to destroy all odor-causing bacteria** because our bodies are constantly creating new bacteria and odor. It's a never-ending battle. And, in most cases, it takes hours for enzymes to be effective.

SCAN ME

The Scent Thief formula is so revolutionary, we have **two patents on it**. We call it No Smell Technology.™ This technology works by targeting the area of the nose responsible for smell, also known as the nasal epithelium. This epithelium is a thin layer of tissue that runs along the roof of the nasal cavity. Its sole purpose is to pass along smell to the brain. Scent Thief works by relaxing this area of the nose and blocking that signal.

EARTH ESSENCE SCENT

PATENTED NO SMELL TECHNOLOGY

KEY POINTS & BEST PRACTICES FOR USING SCENT THIEF

Scent Thief evaporates from anywhere it's been applied and gets carried in the wind cone.

As an animal walks through the wind cone, their scent receptors draw in Scent Thief and it relaxes the epithelium. The relaxation of receptors is what makes the No Smell Technology™ so effective.

Once the scent receptors are relaxed, the ability to smell disappears without alarm to the animal.

As long as the animal is inside the wind cone, and can get Scent Thief in their nose, their ability to smell is gone.

During hunting season, spray at the vehicle and apply to anything that will retain Scent Thief (clothing, boots, equipment, backpack).

When walking in, turn the spray nozzle to the stream setting and spray every 100 yards or so through the woods.

Once in the stand or blind, reapply every 60 to 90 minutes. Reapplication ensures Scent Thief is present and evaporating, creating that scent-eliminating wind cone.

PAGE 3 - PRODUCT INFO

FROM TRUCK TO TREE

Pre-Hunt

Before applying Scent Thief, make sure to **shake the bottle well**. The formula ingredients can separate when the bottle hasn't been used in a while, so always shake it up before application. Prior to walking to your hunting area, apply Scent Thief to all of your clothing, boots and any equipment, such as backpacks. While walking to your hunting location, switch the spray nozzle to the stream setting and spray Scent Thief along your path and on the surrounding vegetation. Do this every 100 yards or so.

Hunting From A Treestand

If you are hunting from an elevated site, such as a tree stand, spray the base of the tree and surrounding brush or vegetation before climbing up. Once in your tree stand, it's a good habit to spray the surrounding limbs or leaves using the mist or stream setting. **Reapply every 60 to 90 minutes**. In extreme weather conditions, such as wind, heat or rain, you will need to re-apply more often.

Hunting From A Blind

While hunting from a ground blind, spray around the outside perimeter as well as inside the blind. Remember to switch the Field Spray nozzle to the stream setting to spray longer distances.

Creating A "No Smell Zone"

Scent Thief must be present at your hunting location and especially downwind of you. Once an animal gets Scent Thief in their nose its ability to smell threatening odors is gone. In order for Scent Thief to be effective, the animal needs to get it in their nose. It's much better to have too much Scent Thief than not enough. You really can't use too much. When using Scent Thief your goal is to create and maintain a "No Smell Zone" around you.

THE NO SMELL ZONE

Using Wafers With Field Spray To Create a No Smell Zone

Using a Wafer in conjunction with the Field Spray is a great way to ensure that Scent Thief is always present during your hunt. In order for Scent Thief to be effective, you want the animal to get it in their nose. After initially applying the Field Spray at the truck and walking to your hunting area, re-apply to your pants or backpack and hang one or two Wafers downwind of your location. Keep in mind your goal is to create a "No Smell Zone" around you and your hunting area.

Hunting From A Tree Stand

If you are hunting from an elevated tree stand, place one Wafer around the base of the tree on a downwind limb or branch so it is three to five feet off the ground. Place a second Wafer above your head (or somewhere close to you) in the tree stand.

Hunting From A Ground Blind

If you are hunting from a ground blind the strategy is very similar to using a Wafer in a tree stand. You will want to place one Wafer on a tree limb on the outside of the blind, and another inside the blind. The Wafers are an excellent way to use the wind to your advantage.

PRO TIP: The best practice is to reapply the Field Spray approximately every 60 to 90 minutes even when used in combination with the Wafers. The Wafers come in a resealable pouch and should last two full days or four hunts. Store the Wafer back in the resealable pouch and take it with you when you are done hunting for the day. Keeping it stored this way will ensure the Wafer does not dry out prematurely. You can recycle a dry Wafer by spraying it down with Scent Thief Field Spray, but the formula used in the original Wafer is a stronger, more concentrated formula, so an original Wafer will be more effective.

NO SMELL SYSTEM

Scent Thief has a full line of products that will help you stay undetected during every stage of the hunt. From scouting and hanging stands to getting that deer in your sights, Scent Thief has you covered.

24oz. SCENT THIEF FIELD SPRAY

Our flagship product. The Scent Thief Field Spray is the original workhorse. Created out of 20+ years of field research and testing. This double-patented product is our best selling product and a must-have for any hunter looking for the absolute best in odor prevention.

ITEM NUMBER FS24

UPC 865800000458

CASE COUNT 6

16oz. SCENT THIEF BODY WASH & SHAMPOO

Scent Thief Body Wash & Shampoo utilizes the same patented formula as the Field Spray. Use it for general hair and body cleansing. Be prepared for the hunt before ever leaving the house.

PRO TIP: Use the Body Wash & Shampoo within three hours of your hunt.

ITEM NUMBER BWS16

UPC 865800000441

CASE COUNT 6

32oz. SCENT THIEF LAUNDRY DETERGENT

Use as part of the total Scent Thief No Smell System. Phosphate free and safe for technical fibers, carbon apparel, and wool. For regular and high-efficiency washers.

PRO TIP: Use the cold or warm water setting on your washing machine. Make sure not to add any other detergents, fabric softeners or dryer sheets, as these may contain perfumes that will interfere with Scent Thief.

ITEM NUMBER DTG32

UPC 865800000434

ESSENTIALS

These products are essential add-ons to our No Smell System.

SCENT THIEF WAFER

The Scent Thief Wafer is the next evolution in No Smell Technology™. Use the Wafer in the field by hanging it in a tree, up-wind of where your treestand or blind is located. The wind will help carry the Wafer scent and create a “No Smell Area” around you.

PRO TIP: The Wafer is not meant to be a stand-alone product. It should always be used in conjunction with the Field Spray.

ITEM NUMBER STWAF

UPC 865800000496

CASE COUNT 20

12OZ. SCENT THIEF FIELD SPRAY

Smaller size of the original 24oz. The 12oz. Field Spray is the perfect size for carrying in a backpack. With the 12oz in your pack, you can easily have it handy while in the stand or blind. One bottle should last two to four hunts and can be easily refilled.

PRO TIP: In extreme cold, keep inside your jacket to keep it from freezing.

ITEM NUMBER FS12

UPC 865800000465

CASE COUNT 6

32oz. SCENT THIEF REFILL

Always be prepared and have extra Scent Thief Field Spray on-hand.

TESTIMONIALS

Russell Epperson

Inventor, Scent Thief

"Scent Thief will change the way you hunt. If it doesn't work for you, you're not using it right."

Bobby Glenn

Host, Chasing the Dream TV

"Scent Thief is the only product I've found that works 100% of the time."

Perry Ross

Owner, Ross Trophy Outfitters

"We've used it all and Scent Thief is the only thing that works. When you can go hunt any kind of wind and it works...you'll believe it."

Corey Brossman

Host, Innerloc's Out There

"There are three things in life I know for a fact: you will die, you need to pay taxes and Scent Thief works!"

George Cummins

Owner, Buck Bourbon

"As an outfitter, I have tried every scent control product out there, and I have never seen anything as effective as Scent Thief!"

Royal Peterson

Outfitter, Missouri Hunt & Fish

"Wind direction is no longer a deciding factor in my client placement."
