DESCRIPTION

The AC04G is a silent electric oil-free air compressor that can be plugged into any nominal 120V outlet and ready in seconds at 125 PSI with 4 gallons of available compressed air, all at an outdoor-tested 54 decibel reading.

This unit comes equipped with a brushless electric motor, 2 quick-connect hose ports with a regulator dial so the tools are given the air pressure they need to operate at their full potential, and when it comes to moving the AC04G around the job site, it couldn't be any easier with its lightweight, compact design and ergonomic lift handle.

When the job is done and it's time to pack up, just turn the pressure switch off, unplug, and pull the release valve to remove any remaining air pressure.
