

GROUND SPOUT

Universal Downspout Extender

NO CUTTING
OR TRIMMING

SIMPLE
INSTALLATION

DIRECT WATER TO
DESIRED AREA

Protect your home's foundation,
shrubbery and roots while controlling erosion.

PROTECT THE HOME'S FOUNDATION AND LANDSCAPING WITH THE GROUND SPOUT UNIVERSAL DOWNSPOUT EXTENDER.

The gutters are up. Downspouts are secured. There's just one more thing left to do: Divert the rainwater that pours through the downspouts. An inch of rainfall will push 620 gallons of water into gutters. With the Ground Spout Extender, you'll help prevent harmful seepage along the foundation, erosion in the lawn, washed-away mulch and more.

DIRECT DOWNSPOUT WATER FLOW WHERE IT NEEDS TO GO.

Ground Spout Extender makes the whole process quick and easy. There's no cutting or trimming involved. Other than a screwdriver (to tighten just two screws), you won't need extra tools. Even placing Ground Spout Extender around curves and angles is remarkably easy. Homeowners will thank you, and you'll thank Spectra for a highly effective solution that's light on effort and big on value:

COST EFFECTIVE

Eliminates leading cause of landscape erosion, helps prevent foundation damage, all at an affordable price

STURDY CONSTRUCTION

Stands up to years of exposure to the elements

FLEXIBLE DESIGN

Easily makes difficult turns and adapts to your needs

COMPLEMENTARY COLORS

White, brown, stone, green and black options match or complement home and grounds

SIMPLE INSTALLATION

Components attach easily; no other tools or accessories required

UNIVERSAL FIT

Works with standard downspouts in 2" x 3", 3" x 4" and 4" round sizes

TRUSTED QUALITY

As the country's largest manufacturer and distributor of gutter products, Spectra ensures craftsmanship you can count on, job after job

**GROUND SPOUT EXTENDER:
THE EASY SOLUTION TO A RECURRING PROBLEM.**

Runoff from repeated downpours and heavy rains can do considerable damage to homes and landscapes – compromising foundations and footings, flooding patios and pathways, wreaking havoc in flowerbeds and lawns. Downspouts alone cannot contain the problems. This is why no gutter installation is complete without the Ground Spout Extender, a combination of interconnecting components that direct downspout flow away from the house.

**GROUND SPOUT
EXTENDER**

The highly effective solution that’s light on effort and big on value. No gutter installation is complete until you **finish the job** of moving the rainwater away from the house.

INSTALLATION IS A SNAP. NO EXTRA TOOLS OR ACCESSORIES NEEDED.

**Fits 2” x 3”
Downspouts**
Use the Ground Spout Extender as is.

**Fits 3” x 4”
Downspouts**
Remove the adapter.

**Fits 4” Round
Downspouts**
Twist to remove the square end. Fit into downspout.

Goes the Distance
Combine multiple Ground Spout Extenders to achieve any length required. Simply remove square ends and join together.

STRENGTH YOU CAN BUILD ON.
