

Diamond Spire® Gardenia *Gardenia hybrid 'Leefive' PP32516*

Diamond Spire produces fragrant, single white blossoms late spring through fall on a truly unique upright habit. These classic blooms are ideal for use as cut flowers for fragrant floral displays. Furthermore, expect the Diamond Spire Gardenia to begin blooming in mid to late spring and to continue to re-bloom from summer to autumn. Therefore, expect to keep your landscape in bloom for much of the year. Use it as a hedge, specimen or a “thriller” in a mixed container.

LIGHT NEEDS Full Sun to Part Shade

USDA ZONES 7a - 10b

MATURE DIMENSIONS 3-4 feet high x 2 feet wide
