

CRE-OIL™

PENETRATING OIL

THE *Gold Standard*
OF PENETRATING
FLUIDS

Cre-Oil Penetrating Fluid is an old formulation improved with current chemistry modifications that has turned this into the new Gold Standard of penetrating fluids, preferred by professionals. CRE-OIL's low viscosity allows it to creep deep and wick into tight crevices to chemically loosen the bond caused by rust and corrosion.

Professionals cannot risk breaking off a rusted and corroded nut or bolt adding unnecessary time to an otherwise ordinary repair. Spray Cre-Oil on area to be worked on and allow the product to creep into crevices to release rust and corrosion allowing frozen nuts and bolts to be disassembled quickly.

- Active ingredients dissolve and cut through grease, oil, and debris allowing Cre-Oil to come in contact with the threads to quickly loosen rusted and frozen parts
- Low viscosity allows the product to "Creep Deep" into the tightest crevices to release the surface tension caused by rust and corrosion
- Lubricant additive package leaves a lubricating film that aids in disassembly and reassembly, and further protects against corrosion

USE IN:

- Automotive
- Industrial/MRO
- Performance
- Farm & Agriculture
- Fleet & Heavy Duty
- And Many Others
