No Longer Just for Parents

With Nursery Pal Deluxe, baby monitors are no longer just for parents. This innovative Hubble product comes with a 5" diagonal HD color touch screen that can be used as an interactive baby viewer for children to use as they grow. The viewer includes videos, picture books, and games to entertain and teach from a young age. Keep an eye on things with the viewer, which also serves as an ergonomic parent unit. With it, easily adjust your view with remote pan, tilt, and zoom from anywhere within an impressive 1000ft/300m range. The high sensitivity microphone makes it easy to hear your little one when they need you, and simple to communicate with your partner or child with the two-way talk feature. Make sure your little one is comfortable with room temperature monitoring, and soothe them to sleep with preloaded nature sounds, lullabies, and audiobooks. With the complimentary Hubble Grip, it is easy to position the Nursery Pal Deluxe Baby Unit at the most convenient place for your family and your child, and with Infrared night vision, that view stays clear day or night. The HubbleClub subscription, available on the Hubble Club App, allows you to receive sound and motion notifications to your compatible viewing device so you can always stay connected to what's going on. You'll also have unlimited streaming and motion triggered recordings stored for 24 hours in the cloud. A wide range of analytics, including Video Recording and the Baby Growth Tracker, give you peace of mind that your little one is healthy and happy. Hubble Nursery Pal Deluxe. No Longer Just for Parents.

What's in the box?

(1) When there is a clear line of sight between parent unit and baby units. Any obstruction between parent and baby units will reduce the range significantly. With parent and baby units indoors, the typical range is up to 165 feet (50 metres).
