## More Than Just a Baby Monitor

Hubble Connected is thrilled to introduce Nursery Pal Dual Vision. This 5" Smart HD Dual Camera Baby Monitor with Motion Tracking & Sleep Routine Management is designed with our patented Dual HD Camera lenses, which allow users to view standard and wide-angle views from the same device. Use the complimentary parent unit to adjust the view of either camera lens as you view them both in split-screen.

Nursery Pal Dual Vision features AI Motion Tracking. When your son or daughter is recognized as the selected person, your high-definition view will automatically pan and tilt to effortlessly keep them in-frame. The perfect view is at your fingertips. This state-of-the-art baby unit also offers a built-in, intercom style communication system called Connect Chat. When your little one pushes the button on the base of the camera, they can speak freely to you. You can easily reply via the parent unit or with your compatible smart device on the HubbleClub app!

View your little one's Video Sleep Diary to see how they slept and receive activity notifications when motion or sound are detected. With the HubbleClub App, routinely manage and log your pumping figures, feeding patterns, diaper weights, and more! Use the Baby Growth Tracker to log each meaningful milestone as your baby progresses.

Nursery Pal Dual Vision. More Than Just a Baby Monitor.
