No Longer Just for Parents

The Hubble innovation is about to change your perception of baby monitors. The Nursery Pal Premium is no longer just for parents. Unlike any other baby monitor, it can be used as an interactive baby viewer for children to use. It comes preloaded with interactive videos, picture books and games for your baby to play with as they grow and evolve. Keep an eye on things with the ergonomic parent unit, which boasts a large 5" diagonal color screen and impressive 1000ft/300m range, and clearly communicate with your partner or child using the two-way talk feature. Mount the baby unit camera with the complimentary Hubble Grip to see the whole room, day, or night, with remote pan, tilt, zoom, and infrared night vision. Hear your little one when they need you with the high sensitivity microphone and know if their room is too hot or too cold with the convenient room temperature display. Control everything on the HubbleClub app, which allows you to receive sound and motion notifications to your compatible viewing device so you can always stay connected to what's going on. You'll also have unlimited streaming and motion-triggered recordings stored for 24 hours in the cloud. A wide range of analytics, including Video Recording and the Baby Growth Tracker, give you peace of mind that your little one is healthy and happy. Nursery Pal Premium. No Longer Just for Parents.

What's in the box?

(1) When there is a clear line of sight between parent unit and baby units. Any obstruction between parent and baby units will reduce the range significantly. With parent and baby units indoors, the typical range is up to 165 feet (50 metres).
