Pairing your
Leo's Loo Too

STEP 1. PLACEMENT

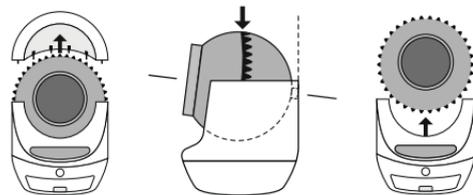

Place unit on a flat even surface to ensure all sensors function properly. **Do not place unit directly on carpet or rugs.**

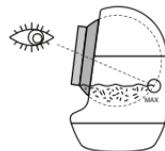

If your unit must go in a carpeted area, please use a firm base underneath.

Allow at least 1 inch of distance from walls and furniture.

STEP 2. PREPARE THE UNIT

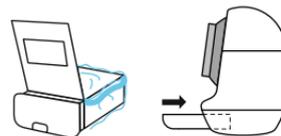

Verify the rotating drum is secure, as it may have shifted during shipping. Drum should be seated evenly in the gear track with spindle aligned in holder.

Add 10-12lbs of litter. Do not fill beyond the indicator sticker.

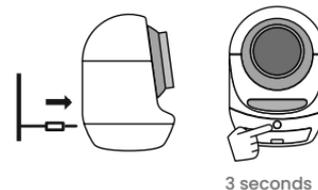

Use only clumping clay litter.

Line waste drawer with the included bags.

STEP 3. PAIRING

Download the Casa Leo app and create an account.

Plug power adapter into an outlet and wait for a beep. Then turn the unit on by pressing the power button for 3 seconds. The drum will rotate and light will flash.

Press the power button for 5 seconds and wait for the light to flash quickly. The Loo is now in pairing mode.

Add Device

In the app, tap on "Add Device" and enter your Wi-Fi password.
