

# ReSTORE<sup>®</sup> WC Water Column Phosphorus Inactivator

## Next Generation Phosphorus Binding Technology

Water lost its luster? You could be struggling with nutrient overload. High levels of phosphorus and other nutrients can rapidly turn your beautiful water body into an ugly mess. ReSTORE WC offers an easy solution for nutrient excess by trapping and removing excess phosphorus.

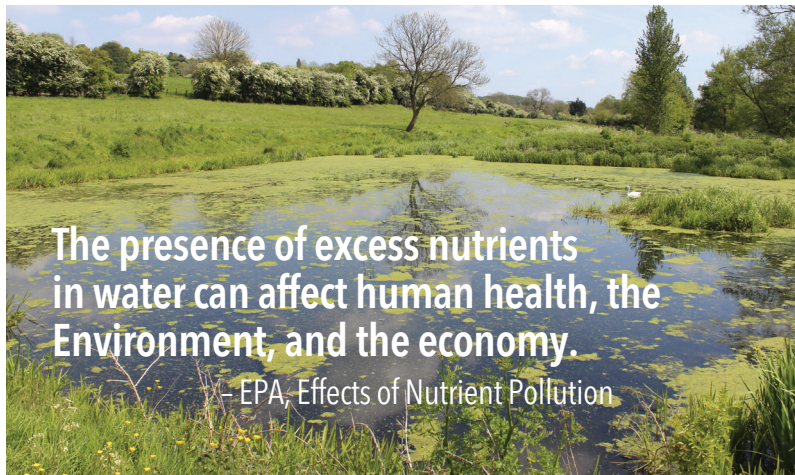

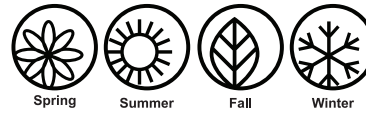

For use in aquatic systems to reduce phosphorus and improve water quality, ReSTORE WC can be used in Koi and garden ponds, stock, farm, and golf course ponds, retention and residential ponds.

### Advantages

- Improved water clarity
- Prevent muck accumulation
- Binds phosphorus
- Offset eutrophication
- Decrease pond odors
- Prevent dissolve oxygen and ph swings

### Application

This product can be used year-round to inactivate phosphorus within your water column. Use routinely bi-weekly/monthly if continuous inputs to your system (waterfowl, well water, stream inflows, run-off etc.). Distribute ReSTORE WC uniformly over the surface of the water body or the area targeted for phosphorus inactivation.

**The presence of excess nutrients in water can affect human health, the Environment, and the economy.**
