

Van Zyverden's
DAFFODIL TETE-A-TETE

Daffodils (botanically called *Narcissus*) are long term perennials and make for great companions to not only other bulbs, but also annuals, perennials, and all sorts of shrubs. They soften hardscapes, accent most any garden, and are an inexpensive solution to adding color to your garden on nearly any budget. They are relatively pest free, and deer will not eat them. Daffodil classifications become quite technical, as they are divided into 13 divisions according to their flower shape and heritage by the American Daffodil Society. They do well throughout most of the U.S., as long as there is a discernible winter. Daffodils are ideal for large plantings and naturalizing, making them an exceptional value item and providing years of carefree color.

Fragrant blooms

Naturalizes rapidly

Deer and squirrel resistant

About This Variety: Miniature Daffodils Tete-a-Tete is by far the most popular miniature daffodil worldwide and a mainstay of the spring. This is the small, early daffodil that everyone loves. It ranks a stunning No. 4 on the worldwide popularity list of all daffodils. Extremely easy to grow, this heirloom variety has a prolific fragrant bloom that brings beauty to every garden. Plant 9 bulbs per square feet for optimum results. Larger spacing may look sparse in early years, but the spaces will fill in over time. Can be left undisturbed for a number of years.

Growing Instructions: In fall, plant the bulbs pointy end up, in deep, fertile, well draining soil in full sun to light shade. Bulbs do not like wet feet. Water during their growth period. Fertilization helps growth and increases naturally by offsets. Daffodils can be left undisturbed to naturalize for years. If you cannot plant them immediately, store in a cool, airy place.

Care Tip: When given ample sunlight, water, and proper nutrition, and by removing the flowers as soon as they fade and allowing the leaves to brown before removing, they will return for years to come with little other efforts.

Exposure: Full sun to partial shade

Height: Grows 8" tall

Spacing: Plant 4-6" apart, 4-6" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
