

13.2-gallon (50-liter) Motion-Sensor Metal Trash Can

Upgrade your waste disposal receptacle with the sleek convenience of a motion-activated metal trash can by Hanover Home. This 50-liter size is perfect for your kitchen, office, or other large space. There's nothing worse than your garbage bag falling into the pail, so this clever model features an inner ring that keeps the bag in place. The smudge-proof finish resists fingerprints to keep the can looking shiny and new. You don't even have to worry about touching the bin and potentially spreading germs with the sensor-activated open-and-close lid. With a simple hand motion, the lid opens long enough to throw away rubbish, then closes 5 seconds after inactivity. Engage the stay-open mode for prolonged disposal as needed.

This durable steel waste bin with battery-powered infrared technology provides consistent operation, low power consumption, and long life. Trash removal is an unavoidable facet of life, so make it easier with all the convenient features of a Hanover hands-free trash can.
