

SIGNATURE FEATURE

2-IN-1 VERSATILITY

Box blade & land plane in one — built to grade, carry, and finish without swapping tools.

BPX60
BOXPLANE

PRODUCT OVERVIEW

The Summit BPX60 BoxPlane delivers a unique advantage for owners who want the cutting and carrying action of a box blade with the smoothing and finishing ability of a land plane in one tool. Built in Wisconsin and designed for Category 1 tractors, this heavy-duty implement helps eliminate the need to swap attachments when the job shifts from aggressive surface correction to refined finishing work. That versatility makes it especially attractive for acreage owners who regularly maintain driveways, parking areas, trails, and utility surfaces.

A convertible rear gate, removable forward cutting edge, and four adjustable scarifier shanks give the BPX60 the ability to break up hardpack, move material efficiently, and leave behind a cleaner finished result. At 500 lb, it brings the kind of weight and substance that improves grading performance while reinforcing its premium build quality.

KEY HIGHLIGHTS

-  **2-in-1 Design**
Combining box blade and land plane functions.
-  **Built in Wisconsin**
Made in USA positioning.
-  **Convertible Rear Gate**
For backdragging and finish work.
