

Directions for TST PRO RV Holding Tank Treatment, American Pine, 32 oz.

Part # 41771

- For each holding tank treatment, add **2 oz (≈ 60 mL)** of product *per 40 gallons (≈ 151 L)* of tank capacity.
- For larger tanks or higher usage, you may increase treatment accordingly for each additional 40 gal of capacity.
- Pour in product first, then add at least 1 quart (≈ 1 L) of fresh water to activate.
- After adding, close tank and use normally. The bio-enzymatic formula works to break down waste, toilet tissue, grease and food debris, and helps maintain tank sensors and prevent buildup.
- Store the product below 110 °F (43 °C) for best performance.
