

PowerGrip - Circuit Analyzer Dogbone 18 in. 30A 125V (E/F)

The Camco Power Grip RV 30-Amp Circuit Analyzer Dogbone with Integrated Surge Protection and Fault Indication helps protect your RV from power surges. Diagnostic LEDs indicate wiring faults when you connect your electrical cord to the power pedestal. The circuit analyzer indicates faults for reverse polarity, open neutral, and other wiring issues. Includes integrated surge protection of up to 2,100 Joules. Durable Power Grip handles make plugging and unplugging easier. It is weatherproof and able to withstand adverse weather conditions when installed in an upright position.
