

HOW TO INSTALL

- 1 Move your car slightly so the tire puncture is at the bottom (6 o'clock position).

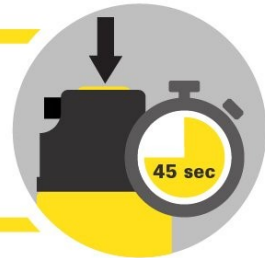

- 2 Get shaking! Shake your can vigorously for 30 seconds.

- 3 Remove tamper evident tab. Tightly twist hose onto valve.

- 4 Hold can upright and push down yellow button for 45 seconds and watch the magic happen.

- 5 Dispense until entire can is empty and tire rim is lifted off the ground.

- 6 Immediately drive your car 2 to 4 miles to help the sealant spread.

That's it! Your flat tire is **TEMPORARILY REPAIRED.**
You have 3 days or 100 miles to get your
tire professionally repaired.
