

WELDED WIRE UTILITY FABRIC

OKBRAND Welded Wire Utility Fabric provides you a great fencing solution. From fencing a garden to fencing ostriches, or for a temporary situation this fence is a perfect choice. Welded Wire Utility Fabric is easily installed because of the wire's ability to be cut and bent with minimum stress while giving you durable and dependable for everyday use which is easy to remove, re-roll, and store for later use.

Our gavanized-before-welded process is used on all OKBRAND welded products. Before welding, wires are galvanized using the tight wipe system, which produces a smooth uniform finish. This eliminates sharp burrs or icicles preventing undue injury to animals or people. Galvanizing before welding combines safety with dependable strength and lasting durability.

What do the numbers in the product description mean?
