

MAX TIGHT SQUARE KNOT HORSE FENCE

Designed for the serious horseman, the Max-Tight Square Knot Horse Fence is manufactured using the Max-Tight Horse Safe Knot. This square knot provides extra vertical strength to withstand the impact of large animals. It also allows flexibility for installation on hilly terrain. Class I Galvanized Horse Fence resists corrosion, which results in a longer fence life. Continuous vertical and horizontal wires, wrapped in a horse-safe knot with a third wire, provide the strength and rigidity as well as the safety needed for

MAX TIGHT SQUARE KNOT SHEEP & GOAT FENCE

Need a field fence with smaller and consistent spacing throughout to contain your sheep & goats and strength of the stiff stay knot? OKBRAND manufactures Max Tight Square Knot Sheep & Goat Fence with 4" x 4" spacing from top to bottom to confine your most stubborn animals.

As with all OKBRAND Max Tight products our Horse Fence and Sheep & Goats products have the added benefit of our unique "Versi-Tail" feature. This feature allows for easier installation by adding a 8" tail at the beginning of each roll and a 8" tail at each end. This feature eliminates the need to remove cross-wire staples to allow enough wire for tying corners or splicing rolls.
