This product's intended use is for dry storage and heated environments in a home or commercial setting. The shelf capacity is 350 lbs. when weight is evenly distributed.

No tools required.

STEP 1: Screw foot (**B**) into a small threaded hole on the end of lower pole (**E**). Connect lower pole (**E**) to upper pole (**D**) by screwing connector (**F**) into threaded ends of the poles (there is a small ridge in the middle of part (**F**) to gauge the distance). If not pre-installed, push the plastic cap (**G**) on the open end of upper pole (**D**). Repeat **step 1** for remaining poles.

STEP 2: Starting at the bottom (the end with the small threaded hole and foot), snap two sleeves (**A**) onto poles at desired intervals. The sleeves are marked with a directional arrows to show proper placement. Use grooves on poles to ensure even shelf placement among the four poles. **NOTE:** Place only enough sleeves to assemble bottom shelf. This step will be repeated for each additional shelf.

STEP 3: Slide poles with plastic cap on top through shelf corners until shelf rests firmly on sleeves. Push or gently tap the shelf down at corners to level the shelf. Repeat **steps 2 and 3** for each additional shelf. Turn feet (**B**) to level unit.
