

GunStiXX Product Description:

- **GunStiXX Plate** – The black rack/plate with holes, size will vary by safe.
- **GunStiXX Cap** - The silver aluminum pieces.
- **GunStiXX Rod** – The red 18" plastic rod.

GunStiXX Instructions:

Step 1: Determine and set the height of the GunStiXX plate.

- For the most versatile configuration set the plate height to fit your longest firearm.

Step 2: Outside the safe, arrange your firearms into clusters.

- For the most optimal configuration group firearms by profile, length, and or personal usage/preference.

Step 3: Add firearms into your safe.

- During this step take your GunStiXX rod and while holding your firearm, insert the rod down the barrel.

Step 3B: Arrange the layout/location of your firearms & secure the GunStiXX into place.

- With the GunStiXX rod inserted down the barrel, pass the other end through the underside of the GunStiXX plate, into a hole. Then connect the GunStiXX rod to a GunStiXX cap for a secure and stable hold.

Step 4: Continue adding firearms till the space available is full.

(Pictures Below)

Extra Important Information:

- For increased stability when using the GunStiXX with short and long firearms, add blocks, ammo cans or other items to raise up shorter rifles.
- Position or place larger/heavy scopes facing towards the back wall of the safe.
- Depending on the internal configuration of your safe the GunStiXX plate size will vary.
- If a GunStiXX rod becomes worn or the friction fit into the GunStiXX cap has become loose, use the other end of the rod, or cut the rod to gain a fresh fit.
