

WINDOW SUET FEEDER

- Feeder attaches to outside of window with suction cups
- Easily holds a single block of suet or a seed cake
- Watch birds feed up close from inside the house
- Window must be freshly cleaned prior to installation
- Suction cups must be freshly washed with warm soapy water and rinsed before installation
- Black metal mesh keeps food secure while providing clinging space
- Slightly rounded roof overhanging directs rainwater from the feeder
- Untreated pine will age to a gray tone over time
