TO USE

1. Remove the bulb cap.
2. Fill the duster bulb. Make sure to wear protective gloves, a dust mask, and goggles.
3. Do not overfill the bulb; leave room for air to propel the powder through the nozzle.
4. Screw the cap onto the bulb, making sure that there are no leaks.
5. Insert the curved or extension applicator nozzle — with the rubber cap on — into the opening in the bulb cap.
6. Turn bulb duster upside down.
7. Remove the rubber cap from nozzle.
8. Point the nozzle towards the area you wish to treat and squeeze the bulb.
9. Keep the bulb compressed until away from treatment area to prevent any build-up in the applicator.
10. Release hand pressure on the bulb and move to the next target area. Repeat squeezing powder out.
11. Periodically shake the bulb to prevent clumping.
12. Remove the extension rod and replace the cap before storing the product.
