

INSTRUCTION

Icon Collection Roman Tub Faucet with Hand Shower
Model NO: UF65510
UF65513

Tools:

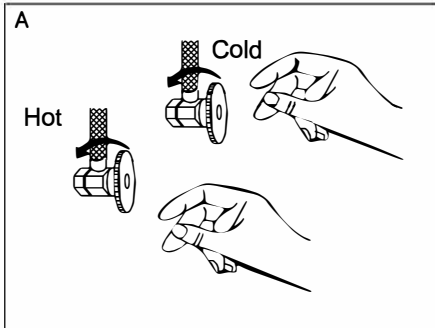

- Adjustable Wrench
- Pliers
- Pipe Wrench
- Screwdriver
- Teflon Tape

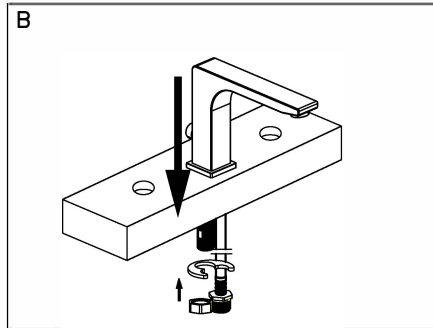

Maintenance:

Your new Roman Tub faucet is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will dull the finish and void your warranty.

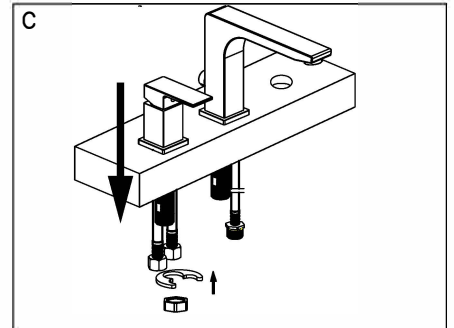

Preparation / Assembly

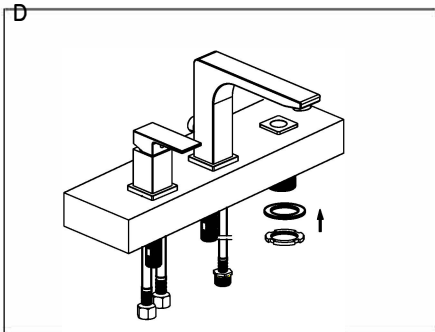

A. Shut off water supply at the valves. Remove old faucet and clean the mounting surface for installation of new faucet.

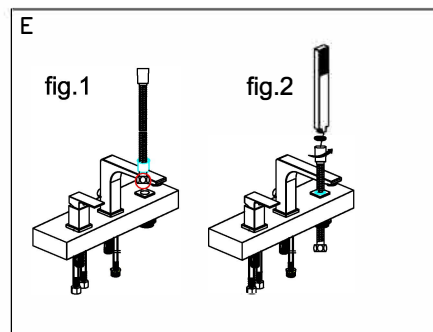

B. Place the spout into the center mounting hole. Secure firmly from underneath with metal washer and nut.

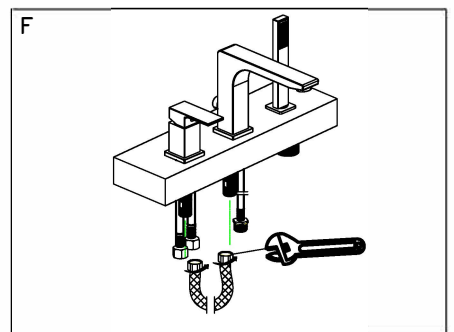

C. Place the handle into the left mounting hole. Secure firmly from underneath with metal washer and nut.

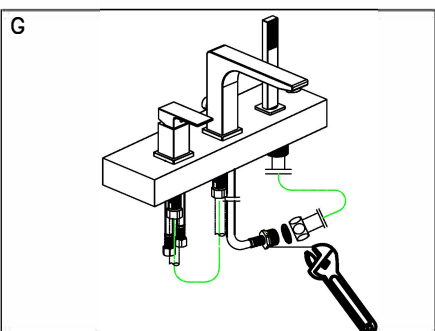

D. Place the hand shower holder in the right mounting hole. Secure firmly from underneath with washer and nut.

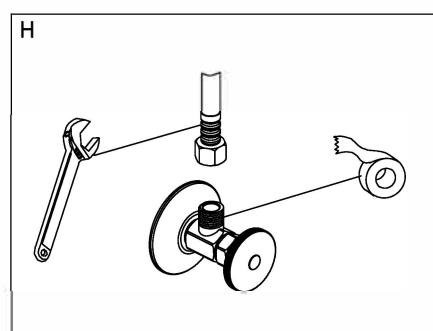

E. Feed the shower hose through the mounting hole (see fig. 1) Then attach the hand shower to the hose, remembering the rubber washer (see fig. 2).

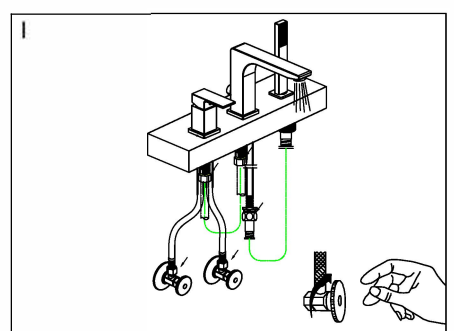

F. Install the connection hose onto the spout inlet tube and the handle outlet tube. Tighten firmly using a wrench. Carefully bend the hoses to fit the available space without kinking.

G. Connect the spout outlet tube to the shower hose and tighten firmly with a wrench. Carefully bend the hoses to fit available space.

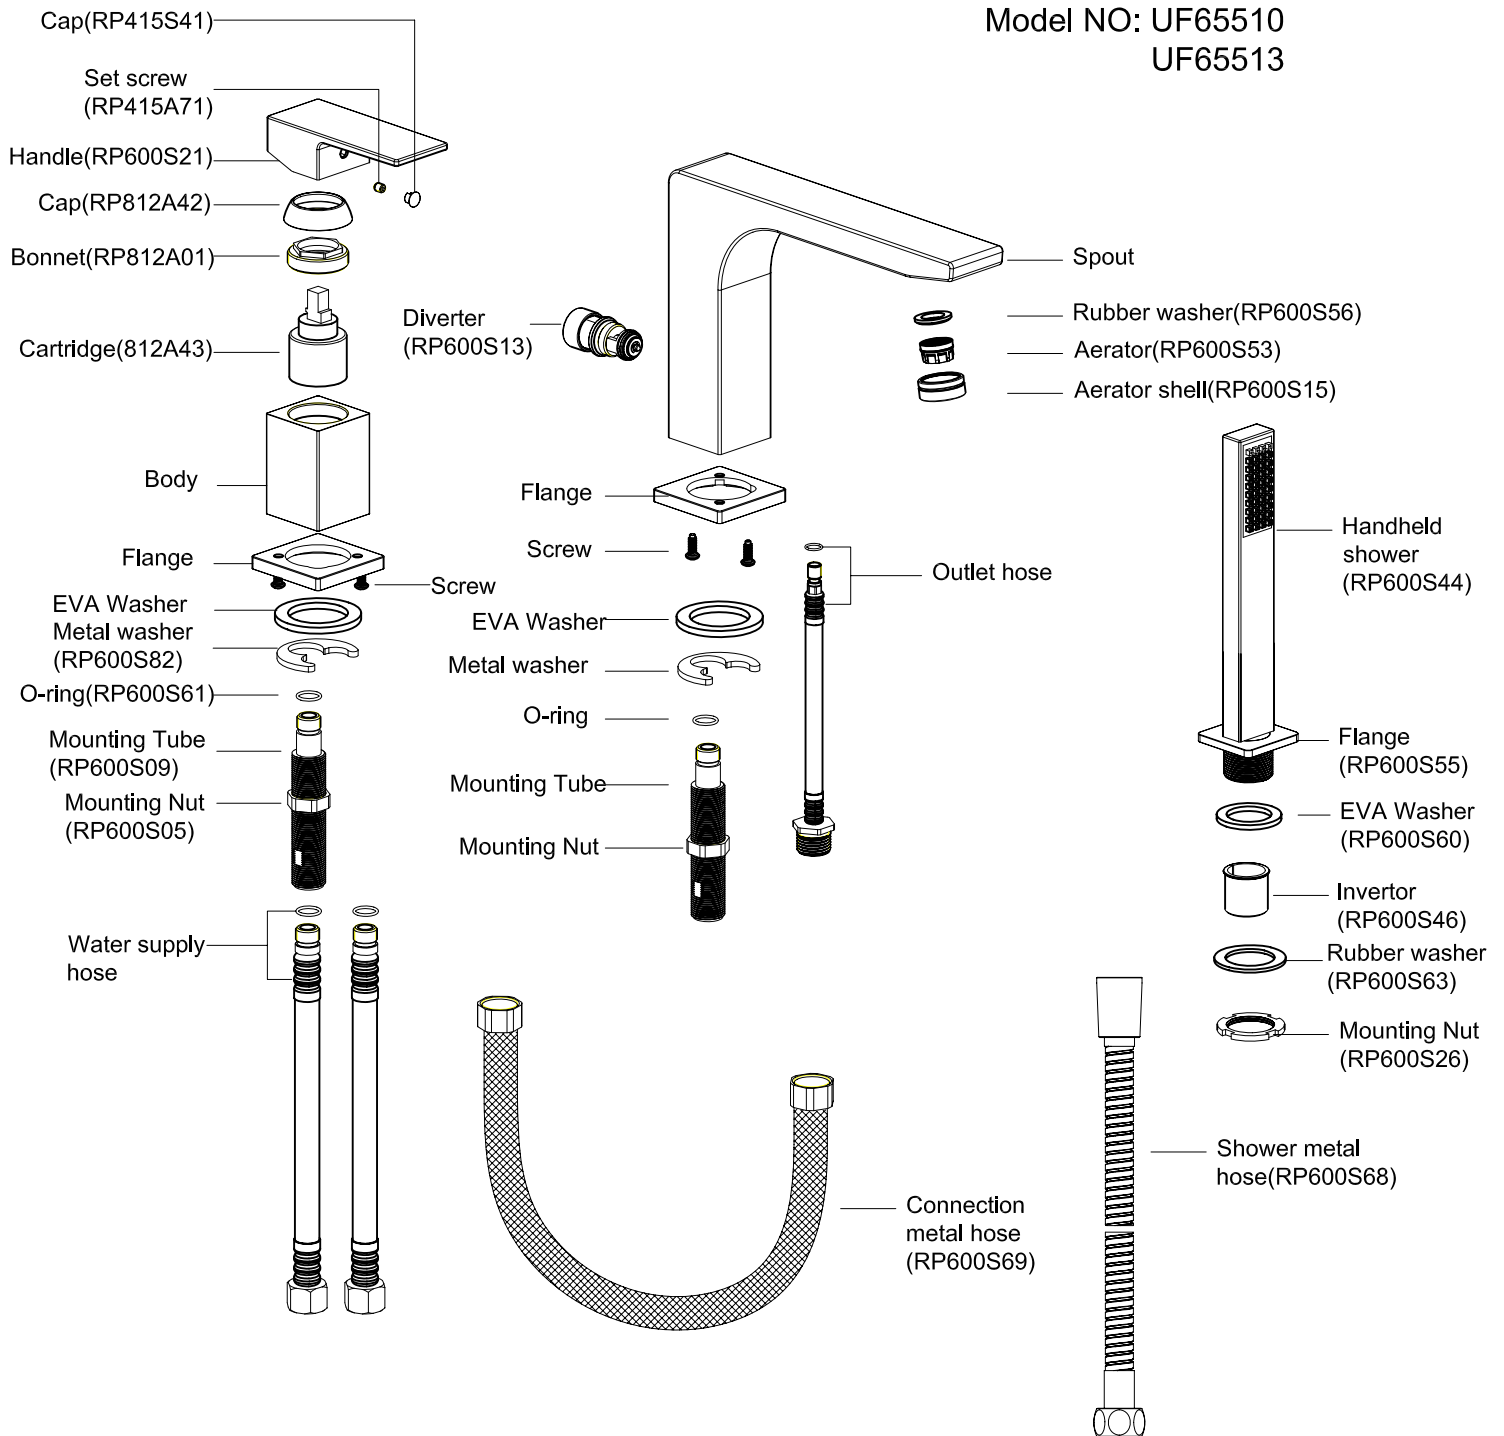

H. Apply Teflon (TPFE) tape on the shut off valves. Thread the tape in counter-clockwise direction. Then connect the supply lines.

I. Turn on the water supply to check for leaks at all connections.
