*****Please read all instructions before installing your new fence.**

*****Below the Surface Dig-In Installation**

1. **Pronged Post Holder** - Dig a hole with minimum of 9" x 9" x 18" depth where you would like to begin building your fence. Wet concrete can be used to seal the post holder into the hole. Please let cure for **48 hours** or until completely dry. The distance between centers of two posts is 72".

2. Insert the post inside the post holder. Be sure that it is completely vertical and straight.

3. Once everything is lined up properly, fit the bottom cover to the post.

4. Insert your boards horizontally from the top to the bottom.

5. Insert the side bar, fitting the top cover to the post, and fasten with a corner clip.

6. Finally, fasten the post cap on top.

Do you have questions, comments, or concerns? E-mail us (info@epdecking.com) or call us at **(866) 344-2600 (Sales)**. Thank you and....

Enjoy Your New Fence!
