

UNBEETABLE™ COMPLETE

ALFALFA + BEET PULP + FLAX MEAL
 + TIMOTHY + FLAX OIL

**COMPLETE NUTRITION.
 GRAIN-FREE ENERGY.**

Unbeetable Complete is a premium, grain-free feed formulated to deliver balanced nutrition and safe calories from forage-based ingredients.

Designed for horses in work, growing horses, and those needing more than just a ration balancer, Unbeetable Complete fuels performance, supports digestive health, and promotes overall well-being.

Now enhanced with **KER Micronutrients** and powered by **BeetAdvantage™ Technology**, Unbeetable Complete provides the advanced nutrition today's horse demands, with science you can trust.

WHY CHOOSE UNBEETABLE COMPLETE?

- **Grain-Free & Ultra Low Starch/Sugar** – Safe for horses with metabolic concerns, PPID, or grain sensitivities.
- **High-Quality Fiber & Fat for Energy** – Alfalfa, Beet Pulp, Flax and Timothy provide safe, steady fuel and healthy anti-inflammatory fats.
- **Fortified with KER Micronutrients** – From Kentucky Equine Research, a global leader in equine nutrition science, comes research-proven trace minerals and vitamins for superior absorption and effectiveness. Now with no added iron.
- **Powered by BeetAdvantage™ Technology** – A unique combination of beet pulp and natural betaine:
 - **Beet Pulp** – A super-fiber that fuels healthy digestion and serves as a natural prebiotic.
 - **Betaine** – A natural compound extracted from beets that aids hydration, supports recovery, and may help with heat stress.

WHEN TO FEED COMPLETE?

- For horses in light to moderate work needing safe energy and complete nutrition
- For young, growing horses needing quality protein and amino acids
- For horses needing more calories than a ration balancer can provide, including senior horses who may have reduced ability to utilize long-stemmed forage
- For horses unable to consume hay or pasture, Unbeetable Complete can be safely fed up to 100% of the daily ration
