

IT'S NOT A CART. IT'S A KNAACK®.

MAXIMUM MOBILITY

- 60% larger diameter & 2X wider wheels designed for the jobsite

DURABILITY

- Up to 750 lb payload
- 2X greater wall thickness
- One-piece handle design

SECURITY

- Fully integrated 16-gauge steel panels enclosed by tongue & groove design
- Up to 70% reduction of assembly time

BEYOND MAXIMUM SECURITY™

MAXIMUM MOBILITY

Built for any jobsite terrain, oversized 8" rubber wheels, 60% larger diameter, and 2X wider than traditional cart castors. Swivel wheels and an ergonomic handle alleviate fatigue when pushing or pulling maximum payloads.

60% LARGER DIAMETER, 2X WIDER

than traditional cart castors

Industrial grade mounting plate

Heavy duty wheel frame

Durable, nonmarring wheels designed for all phases of construction

Designed for higher load rating and easier to traverse jobsite obstacles

Heavy duty ball bearing swivel for smooth turns

Industrial grade wheel lock for safety

Roller bearing construction for reduced friction & enhanced mobility

DURABILITY

Built with a 50% higher load-rating than traditional carts used on jobsites.

SECURITY & ASSEMBLY

16-gauge steel panels with lockable steel doors to prevent theft. Easily put together in less than 10 minutes, saving up to 70% in assembly time. Reducing complexity with only one type of hardware required to assemble.

ARMOURED TRANSPORT

Flat top design for easier materials transport and work surface

Ergonomic handle to alleviate fatigue when pushing and pulling maximum payloads

2X wall thickness for jobsite durability and payloads

Taller than light-duty carts for an elevated work platform

Approx. Dimensions:
45.5" L x 27" W x 37" H

Electrical cord pass through with rubber grommet

Up to 70% reduction of assembly time

Don't need security? Meet the KT-01.

The KNAACK Transport provides the same mobility, durability, and easy assembly without the security armour.

KT-01
(no armour)

PAIR WITH KNAACK®
PLANZBOARD™
to create a Secure Mobile
Planning Station for the jobsite.
