

WINDSHIELD WASHER FLUID

PRODUCT INFORMATION

U1P-Drive Windshield Washer Fluid

UltraVision +32°F

Specialty | United States

Product Description

UltraVision Windshield Washer Fluid +32°F is formulated with advanced technology for streak-free cleaning power. This product is a tough blue washer fluid that applies water beading technology to your windshield for greater driving visibility in warmer weather above 32°F.

Features and Benefits

- An advanced formula that quickly and effectively removes dirt, bugs, and grime from your windshield.
- Specifically designed to provide streak-free cleaning, ensuring excellent visibility, especially in adverse weather conditions.
- Helps to remove road film, bird droppings, bugs, and other tough residues, enhancing driving safety.
- Suitable for all vehicle types, including cars, trucks, SUVs, and RVs.
- Safe for use on all windshield materials, including glass, plexiglass, and plastic.

Directions

- Remove the cap from your vehicle’s windshield water fluid reservoir.
- Pour UltraVision Windshield Washer Fluid directly into the reservoir, filling it to the desired level.
- Replace the cap securely.
- Operate your vehicle’s windshield washer system to dispense the fluid onto the windshield.
- Experience the pleasure of a streak-free and sparkling clean windshield, ensuring optimal visibility for enhanced driving during spring, summer, and autumn.
