LEACH & DRAIN FIELD BLAST

SEPTIC TUNE-UP

 INCREASES FLOW

 PREVENTS SEPTIC FAILURE

 ODOR ELIMINATION

NET WT. 64 OZ (1.93 L)
CONTAINS 1 TREATMENTS

INCREASES FLOW AND DRAINAGE IN DRAIN FIELDS.

EcoStrong's **Leach & Drain Field Blast** contains trillions of beneficial bacteria, and four additional strains of powerful enzymes, that break down clog forming sludge, soap scum, paper, F.O.G.s and more. Additionally, the added enzymes will attack stubborn fouling biomats.

6X AMOUNT OF BIOLOGY COMPARED TO THE LEADING COMPETITOR

Ecostrong's **Leach & Drain Field Blast** also eliminates odors while working in harmony with the system's natural bacteria. Containing six times the amount of biology when compared to the leading competitor, **Leach & Drain Field Blast** will also reduce sludge, increasing the time between pump outs.

Before Use:

Shake vigorously. The use of boiling water, bleach, antibacterial or chemical products, in conjunction with **EcoStrong's Leach & Drain Field Blast**, will negatively impact performance. If your septic tank has been pumped out, wait at least two weeks or until the water level in the tank has reached the outlet. This allows the bacteria and enzymes to flow into the leach field.

Application:

Pour 64 oz. (1/2 of the bottle) of **Ecostrong's Leach & Drain Field Blast** into the distribution box. If this is not possible, pour **Leach & Drain Field Blast** into the septic tank through the inspection pump-out port closest to the leach field. If this also not possible, pour **Leach & Drain Field Blast** down the toilet that is closest to the septic tank and flush twice.

Dosing:

Add the remaining 64 oz. 2 weeks after the first application.

PERSISTENT PROBLEMS:

If septic performance has not improved after 2 weeks from the second application, repeat as above. If problems persist after 2 full gallons, consider using **EcoStrong Septic Liberator**, a more concentrated product designed to fix seriously failing systems.

WARNING: KEEP OUT OF REACH OF CHILDREN. Do not ingest. Wash hands thoroughly after each use. Keep out of eyes and/or open sores. May cause eye irritation. If irritation occurs rinse eyes thoroughly with water for several minutes. If irritation persists, seek medical attention.

STORAGE: DO NOT FREEZE.

NON-TOXIC
SAFE FOR ALL TYPES OF PLUMBING
