

BEFORE USE: Shake vigorously. Read entire label. Always treat at low flow times. The use of boiling water, bleach, antibacterial or chemical products, in conjunction with **Septic Liberator**, will negatively impact performance.

If your septic tank has been pumped out, wait at least two weeks or until the water level in the tank has reached the outlet. This allows the bacteria and enzymes to flow into the leach field.

DOSING: For septic tanks 1,500 gallons or less, use 1 Gallon of Septic Liberator. Repeat the initial dose in two weeks after first treatment.

APPLICATION: Pour **EcoStrong's Septic Liberator Liquid** directly into the distribution box. If this is not possible, pour **Septic Liberator** into the septic tank through the inspection pump-out port closest to the leach field. If this also not possible, pour **Septic Liberator** down the toilet that is closest to the septic tank.

***NOTE:** Not every septic disaster is identical, over then span of several weeks, you may need an additional 1 Gallon treatment of Septic Liberator.*

NON-TOXIC • SAFE FOR ALL TYPES OF PLUMBING

AN ALTERNATIVE TO DIGGING

EcoStrong's Septic Liberator Liquid is the alternative to digging up your septic system when the following symptoms present themselves. Symptoms might include wet grass, sewage odors and slow or gurgling drains. Most often, these occur when the soil in the leach field cannot absorb liquid fast enough. This is caused by a buildup of organic matter called bio-mat in the leach field and surrounding soil.

Simple & Easy To Use:

Digging up your septic system can cost thousands and leave your property in shambles. **EcoStrong's Septic Liberator Liquid** is an easy, ready to use solution. Before you consider digging, use **EcoStrong's Septic Liberator Liquid**.

SEPTIC LIBERATOR IS NON-TOXIC, ENVIRONMENTALLY FRIENDLY, BIODEGRADABLE, AND SAFE FOR ALL TYPES OF PLUMBING.

Not every septic disaster is identical. In some cases, you may need to use **Septic Liberator** more than once over the span of several weeks. We observe that there is approximately an 80% success rate with **Septic Liberator**. For added peace of mind, you can call us directly and we can walk you through the process. In some cases, we can even tailor the treatment to your specific situation.
