

ZE25FC and ZE25DFC 25-Gallon Fuel Caddy w/two way rotary pump

Fuel

These 25-gallon fuel caddies was designed with professionals in mind and allows for both removal and refueling of automobiles, trucks, tractors, lawn and garden equipment, off-road equipment and more! The Fuel caddies include a 7-foot wire reinforced delivery hose to allow for efficient fluid delivery while preventing hose collapse during operation. Compatible with diesel, kerosene, and gasoline this fuel caddy is versatile for a variety of application types. These Fuel caddies are made of heavy-duty steel designed to keep the tank safely grounded during operation for an added peace of mind.
