

## ZE7019L

### Lithium Powered Battery Drum Pump

This battery powered drum pump was designed with professionals in mind and is intended for use with DEF (diesel exhaust fluid), antifreezes, washer fluids, and other water-based chemicals. This unique drum pump uses a high flow turbine pump within the adjustable pickup tube and can be used on containers from 55- gallon drums and IBC totes with a 2-inch port opening. The drum pump features a high-grade 8-foot rubber hose with a trigger style nozzle for accurate and efficient fluid delivery in your shop or facility.
