

Van Zyverden's
WIND FLOWER/ANEMONE DARKEST BLUE

Anemones are lovely small bulbs and are often underestimated like a little treasure. They are an excellent ground cover and a good choice for woodland and rock gardens. The foliage is low-clumping, but the blooms are very colorful.

Full sun to partial shade

Good ground cover choice

Unique blue color

About This Variety: We have identified this color to be special. Anemones in a single color are unique and eye catching. Anemones are widely available at retail nurseries and mail-order catalogs in mixed colors. However, single colors make for striking color displays in the garden.

Growing Instructions: Inexpensive and easy to grow, they are the perfect companion for late daffodils and later blooming tulips. For best effect, plant in mass sweeps with a lavish hand, planting about 16 bulbs per square foot. Purchase several packs to produce that colorful curb appeal effect.

Care Tip: Soak the corms in luke warm water overnight before planting to jump start development. Plant before danger of frost.

Exposure: Full sun to partial shade

Height: Grows 12-18"

Spacing: Plant 3-6" apart, 2-3" deep

USDA Zones: Hardy in USDA zones 7-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
