

Van Zyverden's
FAST TRACK AMARYLLIS™ KIT DOUBLE TIME™ *with XL Artisan Decorative Planter*

Nothing signals the onset of the holiday season than the appearance of Amaryllis bulbs. Amaryllis are one of the easiest, if not THE easiest, bulbs to grow! The bulb itself contains everything it needs to grow and produce blooms that will brighten your indoor spaces. Amaryllis can be grown with or without soil. Amaryllis blooms are available in a wide range of shapes, sizes and colors. Their beautiful blooms are a sight to behold during the dreary winter months.

Fast growing amaryllis variety

Excellent for cut flowers

Easy to grow for indoor decorating

About This Variety: Our Amaryllis kit comes with everything you need to grow this exotic plant: one large South African grown Amaryllis bulb, a 8x5" plastic nursery pot to plant in, a decorative metal planter to drop nursery pot in, planting medium, sheet moss for top dressing and a set of growing instructions. As bulbs are essentially storage mechanisms, they already contain everything needed to produce flowers. Fast and easy to force. Growing instructions included.

Growing Instructions: Hippeastrum (Amaryllis) is a tender bulb and needs to be planted in pots indoors throughout most of North America. To grow indoors as a house plant proceed as follows: Expand the soil block which comes with the kit, following the included directions, then fill about half the pot with the medium. Set the bulb atop the soil, filling in with soil around the bulb to maintain its position. Add the moss on top for a decorative touch. About the top third of the bulb should be left exposed above the soil level, leaving room in the pot for watering. Amaryllis bulbs like room temperatures, and exposure to sunshine will keep them shorter. As the flower stalk grows towards the light, rotate the pot frequently to prevent toppling. Sit back and enjoy!

Care Tip: Amaryllis blooms will last longer if the plant is moved to a cooler place at night (45-55°F).

Blooms: Indoors in Winter

Exposure: Bright, Indirect Light

Height: 11-12"

Spacing: Plant 2-3" deep with top 'point' of bulb exposed above soil line

USDA Zones: Hardy in USDA zones 9-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
