

HANOVER®

71" Galvanized Steel Raised Garden Bed

Elevate your gardens with Hanover's raised garden beds - no more kneeling! The perfect fit for a first-time grower or seasoned gardener, use it in the backyard or front lawn.

Whether you are planting seeds, seedlings, herbs, tomatoes, flowers, fruits, or vegetables, this elevated open-base planter protects against pathway weeds, soil compaction, erosion from rain, leaching, and pests. The open base provides excellent soil drainage to support growth all season long by keeping the root system healthy.

Sturdy, strong, and durable, it is constructed with heavy-duty weather-resistant galvanized steel to withstand rust, rot, mildew, UV rays, and corrosion. Rubber strips top the rim, offering a safe working area to enjoy for many years. With Hanover, you'll enjoy long-lasting controlled spaces to experiment, grow, and nurture your plants with ease.
