

Understanding Why Your Pet Chews:

Pets chew for various reasons; teething, exploration, separation anxiety, boredom, and stress. Chewing is a natural animal behavior, so the goal is to effectively train your pet to chew on appropriate objects. Be sure your pet has appropriate chewing toys.

How Bitter YUCK! Works:

To most pets, Bitter YUCK! has an unappealing taste, making chewing on the particular sprayed object unpleasant, thus decreasing the unwanted behavior. Due to the complexities of taste preferences and behavior issues, results may vary. It is important to monitor your pet's reaction to Bitter YUCK!. Be sure your pet is deterred by the taste before leaving them alone with the sprayed object.

**100% MONEY BACK GUARANTEE
ON PRODUCT ONLY.**

Bitter YUCK! is a training aid, but occasionally a few pets are very persistent due to their natural instinct to chew. Garmon Corporation / distributors / dealers are not accountable for damages to furniture or fixtures created by product use or pet, either in part or full. For more information visit NaturVet.com.
