

Sonar® RTU Application Tips

Sonar RTU (Ready-to-Use) represents an exciting new era in pond weed management tool for the do-it-yourselfer! The innovative new RTU formulation allows anyone to make water usable for recreation, bring fish populations back into balance and restore property values. It's so simple that applying Sonar RTU doesn't require any mixing, special spray equipment or a boat... simply open the bottle and treat from the shoreline.

How Sonar RTU Works

Sonar RTU manages undesirable aquatic weeds for a year or longer and is recommended for use in ponds with soft or muck bottoms. Sonar RTU is an easy to use liquid formulation that is applied straight from the bottle. Sonar RTU works by stopping photosynthesis, which robs target plants of their ability to make food. Target plants turn white and gradually die over a period of 6 to 12 weeks. Unlike other aquatic herbicides, Sonar RTU has no restrictions for swimming, fishing, boating or livestock use, even immediately after application. Check the label for irrigation precautions.

How to Apply Sonar RTU

Sonar RTU comes in a distinctive squeeze bottle that only requires the user to lift the nozzle on the lid and squirt the

Sonar RTU directly into the water. Treating an entire pond only takes a few minutes. After measuring the size of your pond, consult the rate chart (below) with each Sonar RTU purchase to determine the amount of Sonar RTU required and when to apply each application. You'll apply half of the total dose on day one, then return 21 days later, and then again 42 days later to add the rest. Simply apply Sonar RTU at 3 to 4 locations around the pond each time and the unique formulation of Sonar RTU will disperse throughout the water. Rinse the empty container and pour directly back into the pond after application.

Sonar RTU Application Rates/Timing Table

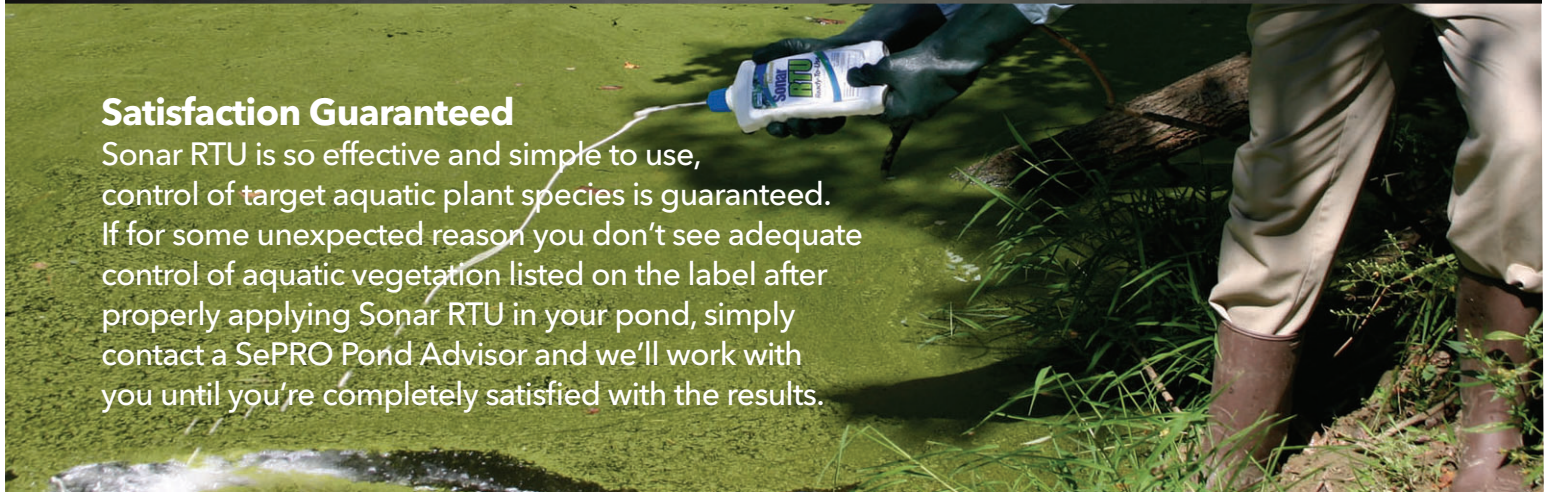

Pond Size	Acres	Total Sonar RTU (Bottles needed)	Day 1 (Application Amount)	Day 21 (Application Amount)	Day 42 (Application Amount)
5,445	1/8	32 oz. (1 qt.)	16 oz.	8 oz.	8 oz.
10,890	1/4	64 oz. (2 qt.)	32 oz. (1 qt.)	16 oz.	16 oz.
14,520	1/3	96 oz. (3 qt.)	48 oz.	24 oz.	24 oz.
21,780	1/2	128 oz. (4 qt.)	64 oz. (2 qt.)	32 oz. (1 qt.)	32 oz. (1 qt.)
32,670	3/4	192 oz. (6 qt.)	96 oz. (3 qt.)	48 oz.	48 oz.
43,560	1.0	256 oz. (8 qt.)	128 oz. (4 qt.)	64 oz. (2 qt.)	64 oz. (2 qt.)

Sonar® RTU Application Tips

Satisfaction Guaranteed

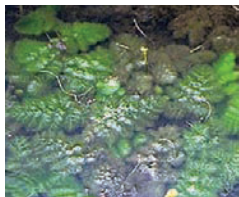

Sonar RTU is so effective and simple to use, control of target aquatic plant species is guaranteed. If for some unexpected reason you don't see adequate control of aquatic vegetation listed on the label after properly applying Sonar RTU in your pond, simply contact a SePRO Pond Advisor and we'll work with you until you're completely satisfied with the results.

Sonar RTU and Duckweed

Many pond owners consider duckweed to be their toughest aquatic weed problem. Duckweed is a very common nuisance aquatic weed that is spread from pond to pond via waterfowl or other wildlife. While it is commonly mistaken for algae, duckweed is actually a tiny plant with an explosive reproductive capacity that can completely cover a pond in just a few weeks to the point that the infested pond resembles a golf-course green. Fortunately, no other aquatic herbicide is more effective on duckweed. Sonar RTU provides complete, long-lasting control of duckweed and other stubborn unwanted aquatic vegetation.

What Sonar RTU Controls

Bladderwort

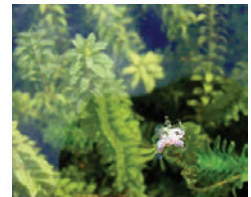

Coontail

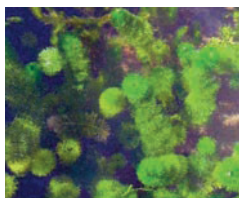

Duckweed

Egeria

Elodea

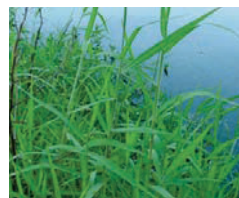

Fanwort

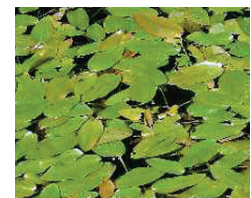

Hydrilla

Naiads

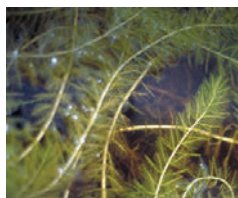

Para grass

Most Pondweeds

Spatterdock

Watermilfoils, most

Water lily
