## Codling Moth Pheromone Trap

Ready-to-Use

### QUICK FACTS

Pheromones are substances produced by insects which operate as a signal between individuals of the same species.

This product uses sexual pheromones as a lure placed inside a trap which mimics the substance produced by the female.

Lure attracts males which are captured in the trap.

### OTHER FEATURES

- Unique patented process of pheromone micro-encapsulation
- Constant and extended rate (3 months) of pheromone release for greater efficiency
- 100% biodegradable ingredients
- Easy storage, at room temperature
- Extended shelf life: 2.5 years

Active Ingredient  
(E,E)-8,10-dodecadien-1-ol  
For Outdoor Use Only

### STORAGE & DISPOSAL

Keep out of reach of children.

Keep away from domestic animals. Store away from food and drink.

Store in original packaging.

Comply with doses, conditions, instructions and precautions for use mentioned in the inner leaflet.

Do not freeze.

Dispose of the empty and clean packaging in household trash.

Avoid release to the environment.

Take up liquid spill into absorbent material.

Dispose of materials or solid residues at an authorized site.

### DIRECTIONS FOR USE

**This packaging contains one Codling moth pheromone vial and one Delta trap.**

**Trap setup:** Remove the protective film from the sticky sheet. Stick the green cup in the middle of the sticky sheet. Empty the contents of the vial simply by pressing the plunger (no need to cut the tip) into the mini-tray. Place the sticky sheet in the trap. The moths are attracted by the sexual pheromone, enter the trap, and are caught. Replace the sticky sheet once it is full. There are two sticky sheets, so they can be swapped during the season.

For best results, hang the trap on top of apple or pear trees. One trap covers a radius up to ~32 ft or 3,380 sq ft.

See the inner leaflet for more details on trap setup.
