MV PRO UNIT

SPANNER WRENCH

DRILL ATTACHMENT

ROTATION PIN

BALL CONVERTER

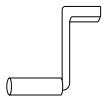

COUPLING PLATE

2" HITCH BALL

BALL BASE

HAND CRANK

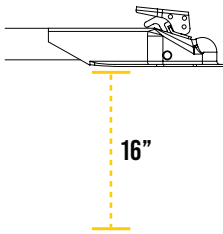

MANUAL

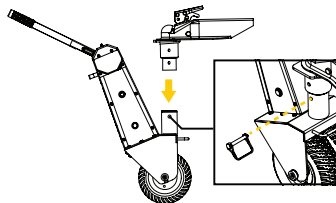

TRAILER VALET MV PRO

Quick Start Guide

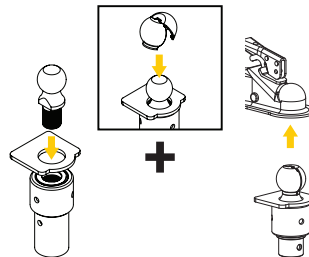

Rev 7.01.24

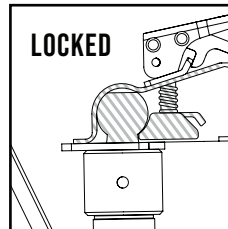

1. Check trailer height and raise the trailer tongue to where the frame is about 16 inches off the ground to give adequate space to attach the dolly.

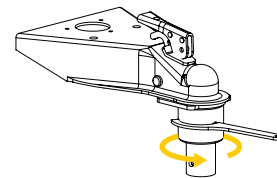

4. Using your trailer jack, lower the hitch towards the unit's rotating coupler and attach rotation pin to secure.

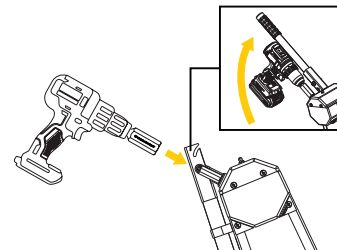

2. Set up hitch ball and ball base. Then attach to coupler.
Optional: For 2-5/16" couplers, attach ball converter to hitch ball.

5. Make sure the MV Pro is securely tightened and not rocking.

3. Use spanner wrench and tighten that base firmly!

6. Align and insert the drill adapter to the drill adapter driveshaft. Lift the steering handle to disengage brakes, and start moving!
