FEATURING PATENTED

SUB-X[®] BULLETS

SHHH...TELL EVERYONE

Hornady[®] Subsonic 300 Blackout ammunition is a high performance, true controlled expansion subsonic round. The Flex Tip[®] insert and optimized design of the new, patented SUB-X[®] bullet help it to expand at subsonic velocities as low as 900 fps.

The results are deep penetration and large wound channels with no loss of accuracy, proving that you don't have to be fast and loud to make a big impact.
