Assembly Instructions:

* It is suggested to have 2 Adults to complete the assembly.

1. Find a flat surface and place the **Body** section upside down on the floor as shown.

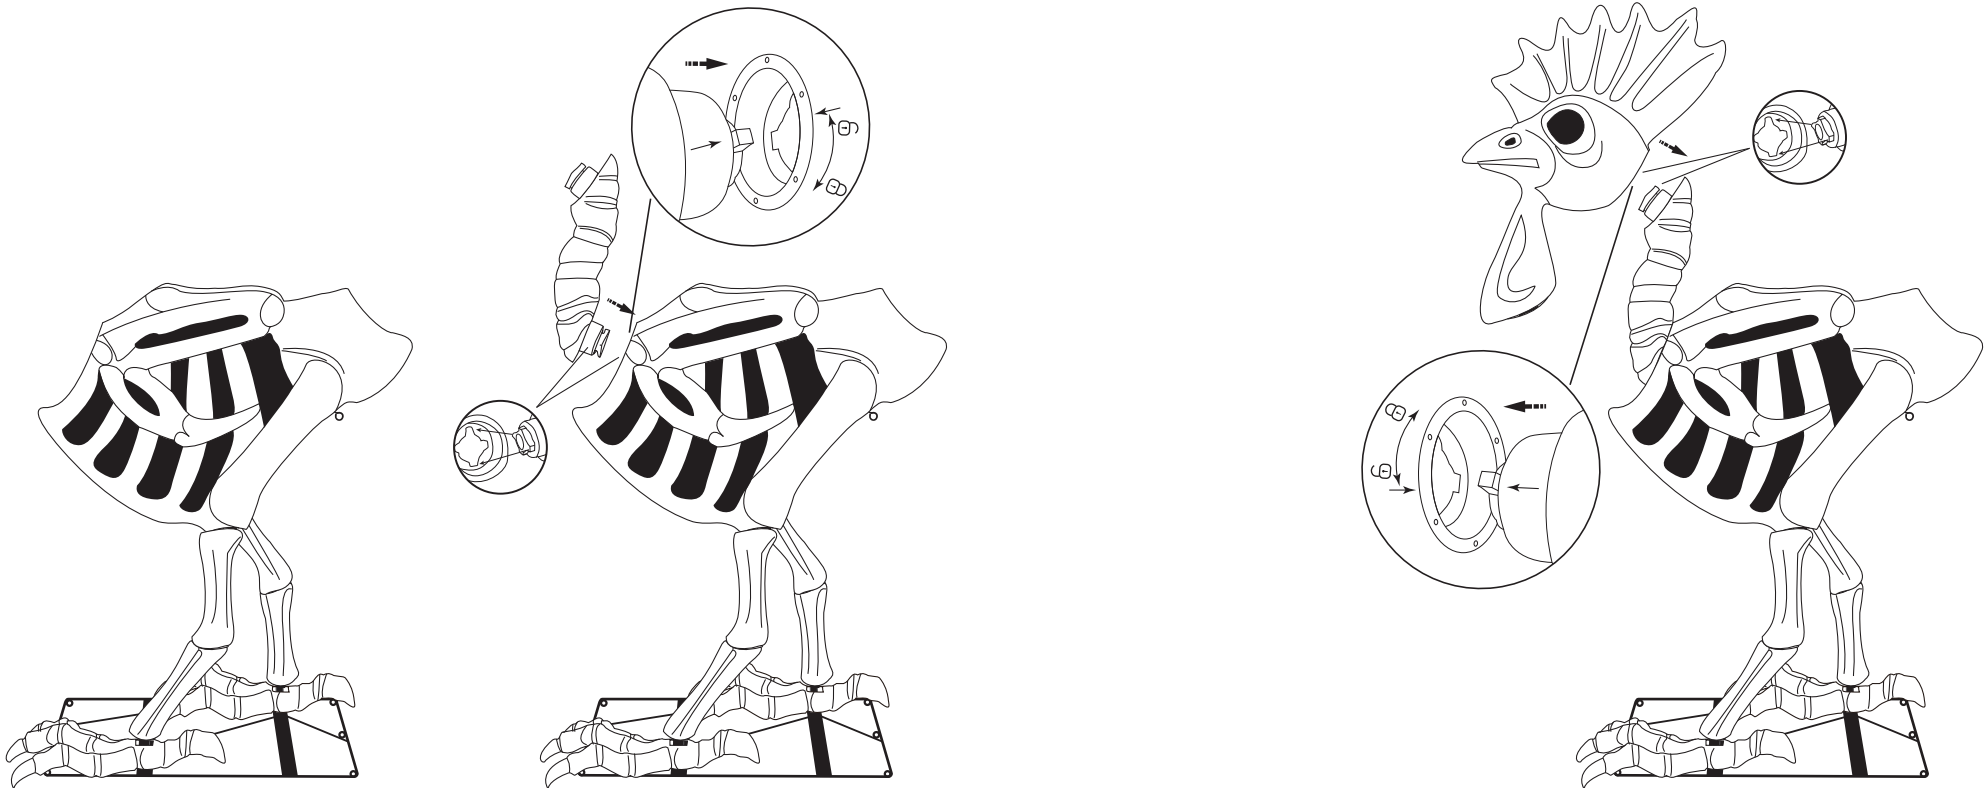

2. Installing the **Legs** to the Body. Match up the letters and numbers on each support pole , "L1" to "L1" and "R1" to "R1". Slide the leg sections onto the Body poles until they click into place.

3. Check the **legs** to make sure every piece locked into position and fit firmly.

4. Install the **Feet** onto the legs, there are letters marked on the feet and legs, match "L2" to "L2" and "R2" to "R2". Align the square hole on the feet with leg, make sure the feet installed in position.

5. Install the **Metal Base** on the feet by matching the letters, match "L3" to "L3" and "R3" to "R3". When inserting the connection part of the base into the support pole of the leg, you may need to push it in with some force.
Important - Be sure the metal base section is clicked in and secured in position so there is no gaps between the metal base and the feet.

6. Use the two **Screws**(included) to secure the metal base to the feet. Be sure to screw one in the right Foot and one into the left Foot as pictured using the **Hexagon Tool** included. Do not over tighten the screws.

7. Stand the Body section up now on the base to install the **Neck**. Align the two arrows indicated on the neck and the body to match up, the shape of the Neck peg must align with the hole shape in the body, and then gently push the neck bone into the body. Now rotate the neck clockwise to lock into the body. Once locked into position it will fit firmly together.

8. Install the **Head** onto the neck using the same method as in step 7.

9. Install the **Tail** into the Body, same method as above as well, now your Giant Skeleton Rooster is ready. For outdoor use, you can use the metal **Stakes** to secure the base as shown.

For Added Stability

- 1. For extra stability, please use the ring provided at the back of the Rooster and tie it to a wall with a string (Included).
- 2. Use extra weight on the metal base, if your area is windy which may cause the Rooster to fall.

For Decoration Only.
Not a Toy.
Not intended for children.
