

Plant With Purpose™

Acid Loving Plant Booster Water-Soluble Fertilizer 10 pods

Mixing: Simply drop one water-soluble pod into one gallon of water. Stir or shake the container as the pod dissolves. Unused solution may be stored for a few days, and should be stirred or shaken before each use.

Application: Apply the fertilizer solution to flower beds or individual plants as if you were watering them. Reapply every 7-14 days when the plants are in active growth and bloom.

Storage: Because the water-soluble pods will readily absorb water, it is important to store them in a dry area and keep the container tightly closed at all times.

Recommended for any acid-loving plants—including, but not limited to, Blueberries, Hydrangea, Camellia, Rhododendron, Azalea, Gardenia, Citrus, Dogwood, Fothergilla, Liriope and Pieris.

Total Nitrogen (N).....	21.00%
Nitrate Nitrogen	2.10%
Ammoniacal Nitrogen	14.10%
Urea Nitrogen	4.80%
Available Phosphoric Acid (P ₂ O ₅)	7.00%
Soluble Potash (K ₂ O)	7.00%
Trace Elements	
Boron (B)	0.02%
Copper (Cu)*	0.05%
Iron (Fe)*	0.10%
Manganese (Mn)*	0.05%
Molybdenum (Mo)	0.001%
Zinc (Zn)	0.05%

*chelated

Primary Plant Food Sources:

Ammonium Phosphate, Potassium Nitrate, Ammonium Sulfate, Urea.

Secondary Plant Food Sources:

Iron EDTA Chelate, Manganese EDTA Chelate, Copper EDTA Chelate, Zinc EDTA Chelate, Sodium Borate, Sodium Molybdate. **Chlorine Free**

Net Weight 5.7oz.
