

## ZE1030 Series AA Battery Powered Fuel Can Transfer Pumps

### Fuel

These fuel can transfer pumps were designed for use with fuel cans up to 6-gallons and can be used to fill a variety of applications. With a press of a button the turbine pump activates and allows for fluid to travel through the hose to the application you are refilling. The transfer pump can be used for automobiles, ATVs, Lawn & Garden Equipment, and more! This pump is compatible with gasoline, diesel, kerosene, light weight oils and non-potable water.
